

# **Rebalancing Growth in Asia**

Eswar Prasad

Cornell University, Brookings Institution and  
NBER

# **Overview**

- The debate: role of global macroeconomic imbalances in the crisis

# Overview

- The debate: role of global macroeconomic imbalances in the crisis

*“...the President highlighted a factor that economists agree on: that the most significant factor leading to the housing crisis was cheap money flowing into the U.S. from the rest of the world, so that there was no natural restraint on flush lenders to push loans on Americans in risky ways. This flow of funds into the U.S. was unprecedented. And because it was unprecedented, the conditions it created presented unprecedented questions for policymakers.”*

White House Statement, December 2008

# Overview

- An Asian perspective but with global implications
- Composition of growth
- Savings-investment balances
- Components of national saving
- Household saving: a case study of China
- Welfare and policy implications

# **Composition of Growth**

**Shares of Real GDP**  
**(in percent)**

Country	2000				2007			
	Consumption				Consumption			
	Pvt.	Govt.	Invst.	Net X	Pvt.	Govt.	Invst.	Net X
Bangladesh	73.1	4.2	23.8	-3.8	66.0	5.4	27.9	-1.0
Cambodia	88.8	5.2	16.9	-11.8	84.9	4.2	20.7	-9.5
China	46.4	15.9	35.3	2.4	35.4	13.3	42.3	8.9

Sri Lanka	72.1	10.5	28.0	-10.6	73.8	9.0	28.7	-11.5
Taiwan	60.4	13.9	23.1	2.7	54.6	11.1	19.0	15.2
Thailand	54.0	9.2	20.7	14.9	51.8	9.1	22.4	16.0
Vietnam	66.7	6.7	30.5	-3.7	65.5	6.6	43.1	-17.1
Unweighted medians:								
All Countries	64.2	10.1	25.4	-1.2	57.6	9.1	22.4	8.9
All excl. China	65.1	9.7	25.0	-1.4	58.7	9.0	22.3	6.5
International Comparisons:								
Japan	56.2	16.9	25.5	1.5	54.7	17.3	23.3	4.7
U.S.	68.7	14.4	20.8	-3.9	71.6	14.3	18.9	-4.7

## Contributions to Growth and Employment Growth, 2000-07 (in percent)

Country	GDP Growth	GDP Growth Contributions				Employ -ment Growth	
		Consumption			Invst.		
		Total	Pvt.	Govt.			
Bangladesh	5.8	3.4	3.0	0.4	2.0	0.3	-1.4
Cambodia	9.0	6.9	6.6	0.3	2.3	-0.4	5.7
China	10.1	4.3	2.9	1.3	4.5	1.2	0.9
Hong Kong	5.3	2.3	2.2	0.2	1.2	1.8	1.5
India	7.0	4.0	3.5	0.5	3.4	-0.2	1.9
Indonesia	5.1	3.0	2.4	0.6	1.2	0.3	1.5
Korea	5.2	2.7	2.1	0.6	1.2	1.3	1.8
Malaysia	5.1	4.4	3.4	1.1	0.5	0.2	2.2
Pakistan	5.3	3.8	3.2	0.6	1.2	0.3	3.0
Philippines	5.1	4.0	3.8	0.2	0.7	1.4	2.5
Singapore	5.9	2.9	2.2	0.7	0.7	2.7	7.4
Sri Lanka	5.0	4.5	4.0	0.4	1.5	-1.0	1.9
Taiwan	4.1	1.6	1.6	0.1	0.2	2.2	1.0
Thailand	5.1	2.9	2.5	0.4	1.5	0.6	2.1
Vietnam	7.6	5.0	4.5	0.5	4.4	-2.1	2.6
Unweighted medians:							
All Countries	5.3	3.8	3.0	0.5	1.2	0.3	1.9
All excl. China	5.3	3.6	3.1	0.5	1.2	0.3	2.0

# **Dependence on Exports**

## Openness to Trade, 2007 (in percent of GDP)

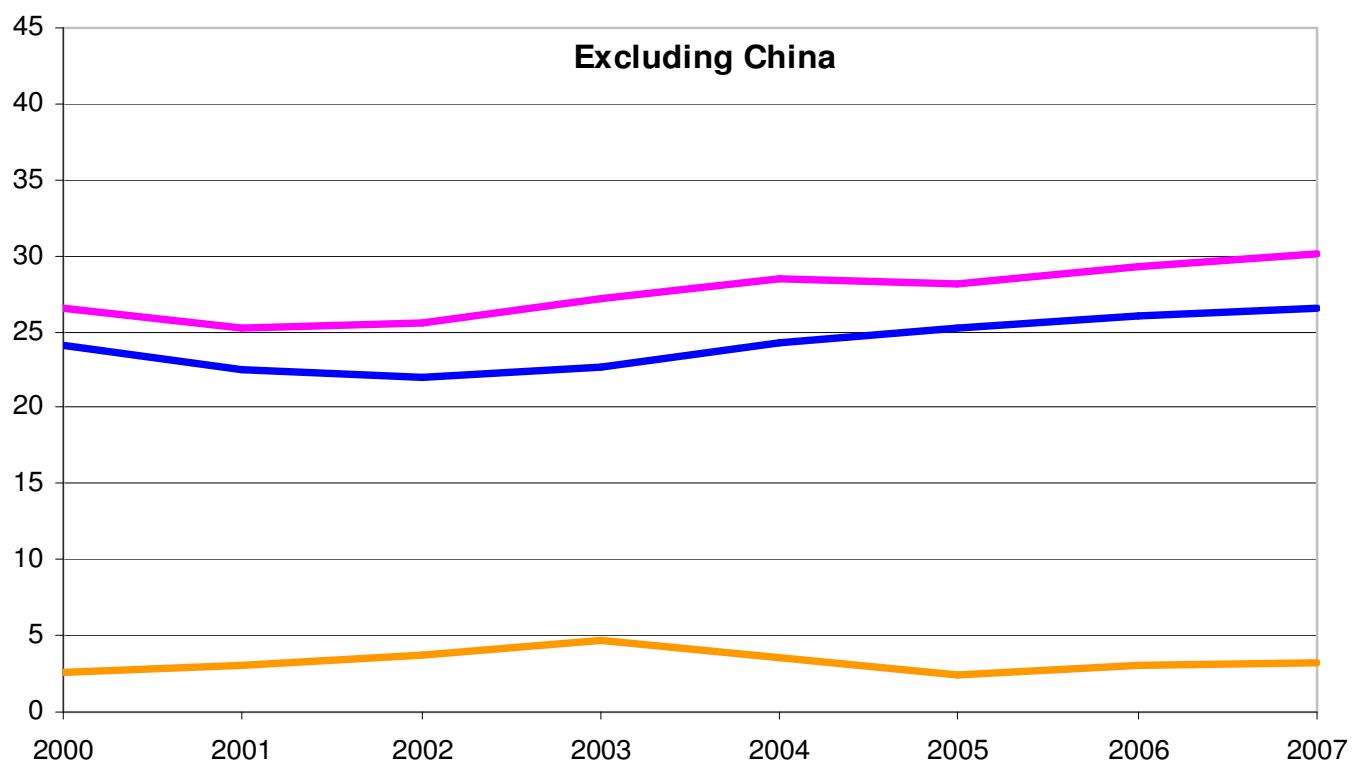

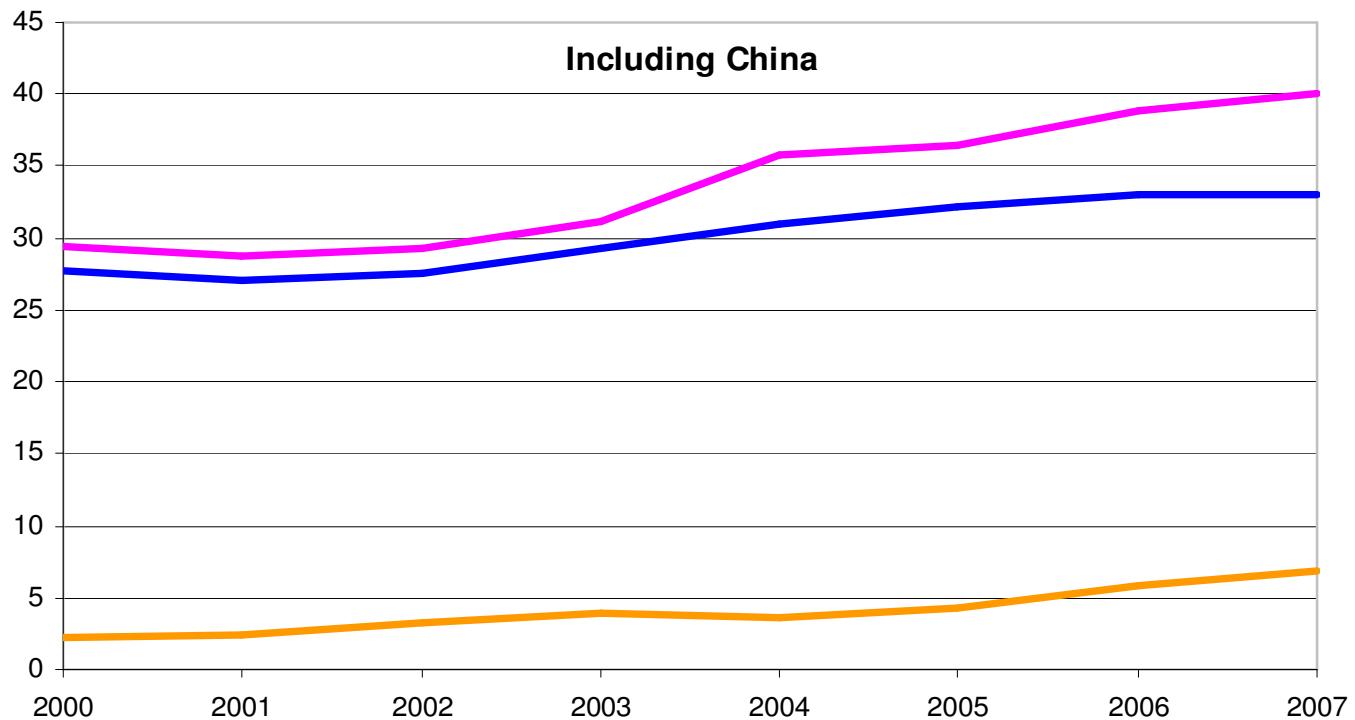

Country	Exports	Total Trade	Trade Balance
Bangladesh	22.0	50.8	-6.9
Cambodia	47.1	109.5	-15.4
China	40.7	72.1	9.3
Hong Kong	207.6	404.5	10.6
India	21.2	45.4	-3.1
Indonesia	29.4	54.7	4.0
Korea	45.6	90.4	0.8
Lao	22.2	47.7	-3.4
Malaysia	110.2	200.1	20.3
Pakistan	13.9	36.2	-8.3
Philippines	42.6	84.8	0.5
Singapore	185.3	348.2	22.5
Sri Lanka	29.2	68.8	-10.3
Taiwan	73.8	140.0	7.5
Thailand	73.2	138.7	7.6
Vietnam	76.8	167.0	-13.4
Unweighted medians:			
All Countries	44.1	87.6	0.7
All excl. China	45.6	90.4	0.5

# **Savings-Investment Balances**

### Current Account Balance, and Household Saving, 2007

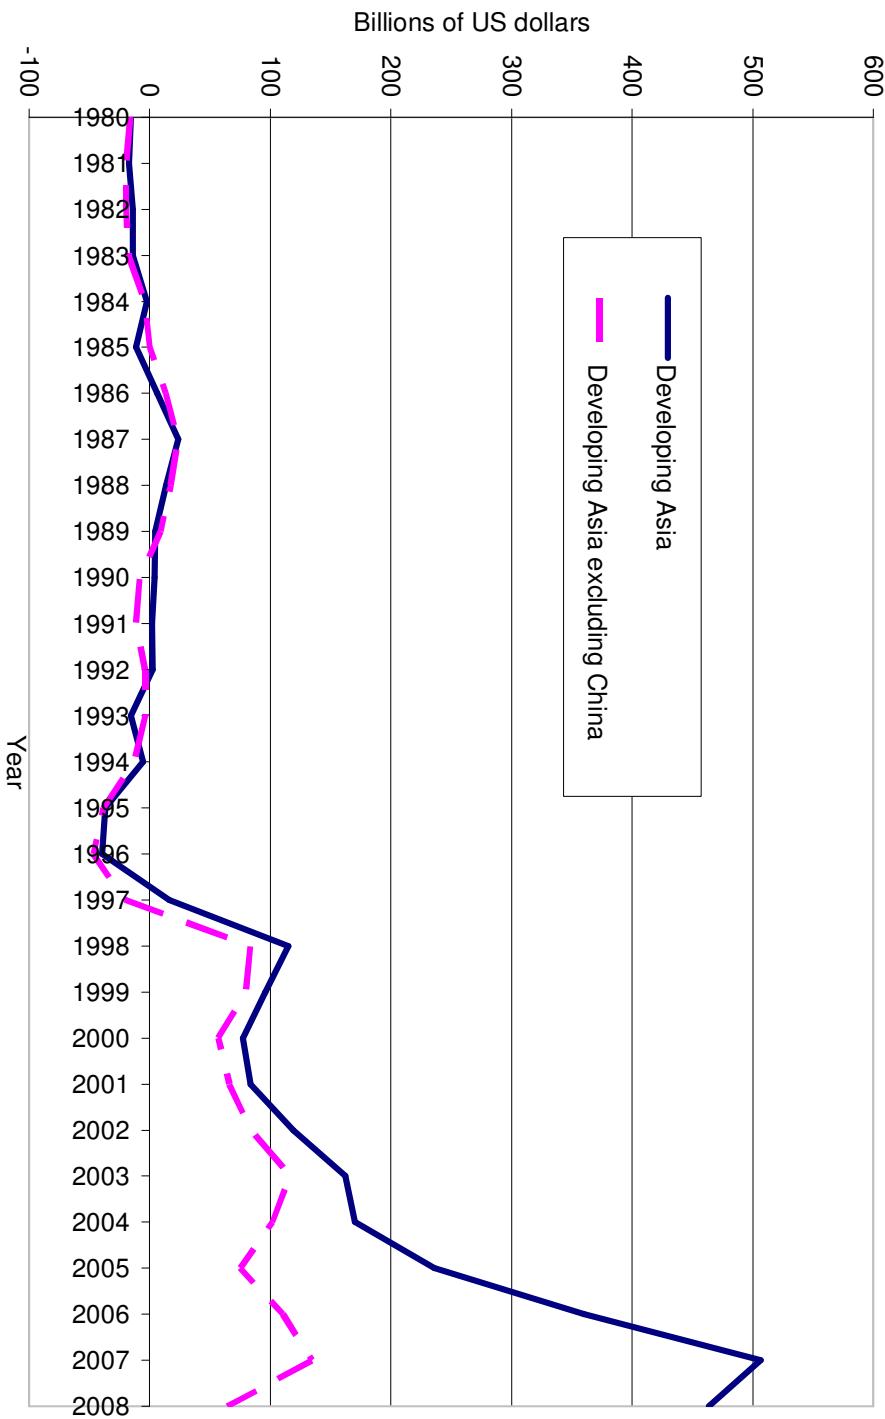

Country	Nominal GDP (USD billions)	Current Account Balance		Gross National Savings		Household Saving	
		Value (USD billions)	As percent of GDP	Value (USD billions)	As percent of GDP	Value (USD billions)	As percent of household disposable income
Bangladesh	68	0.8	1.1	19.8	26.9	--	--
Cambodia	9	-0.3	-3.6	0.8	13.1	--	--

**Aggregate Savings-Investment Balance  
for Developing Asia  
(in percent of GDP)**

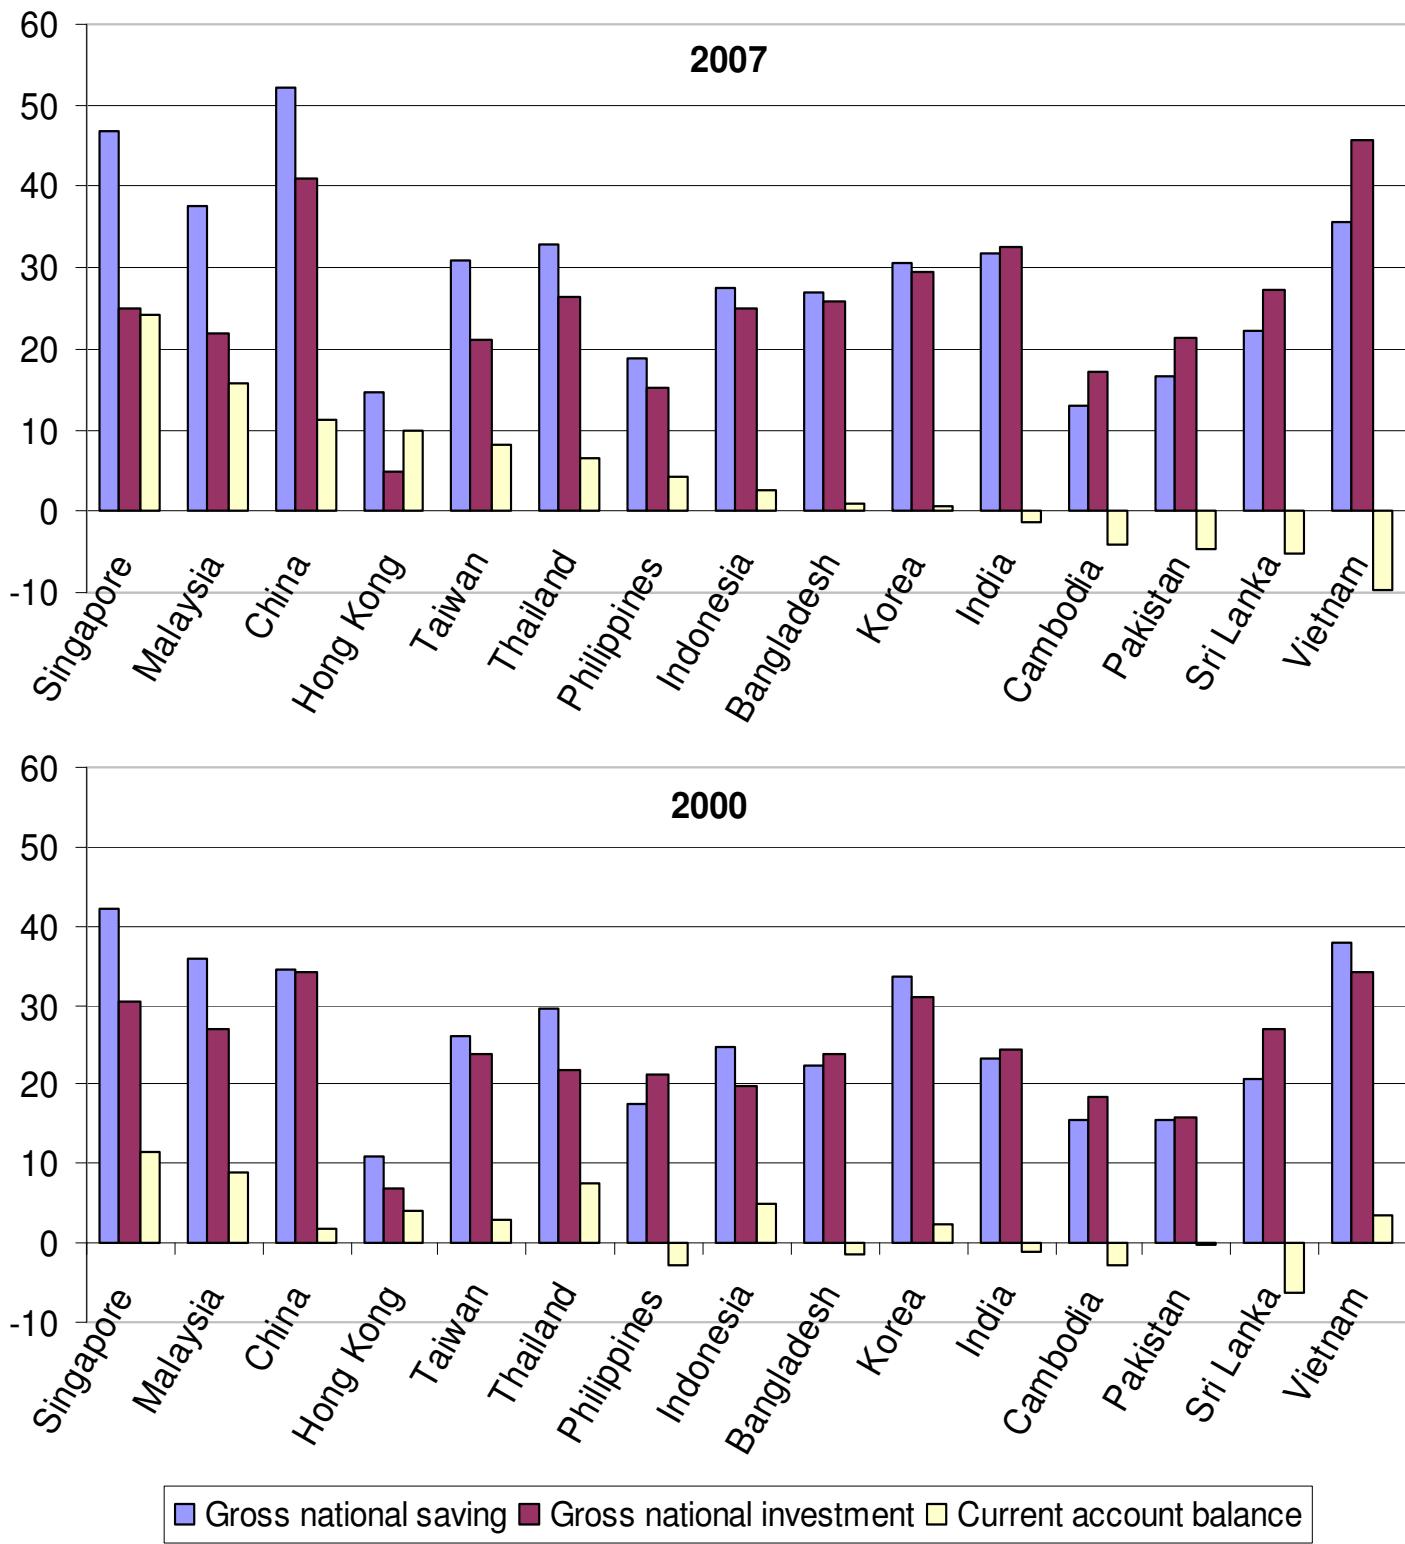

— Current Account Balance   — Gross National Investment   — Gross National Savings

## Aggregate Current Account Balance for Developing Asia

## Savings-Investment Balances (in percent of GDP)

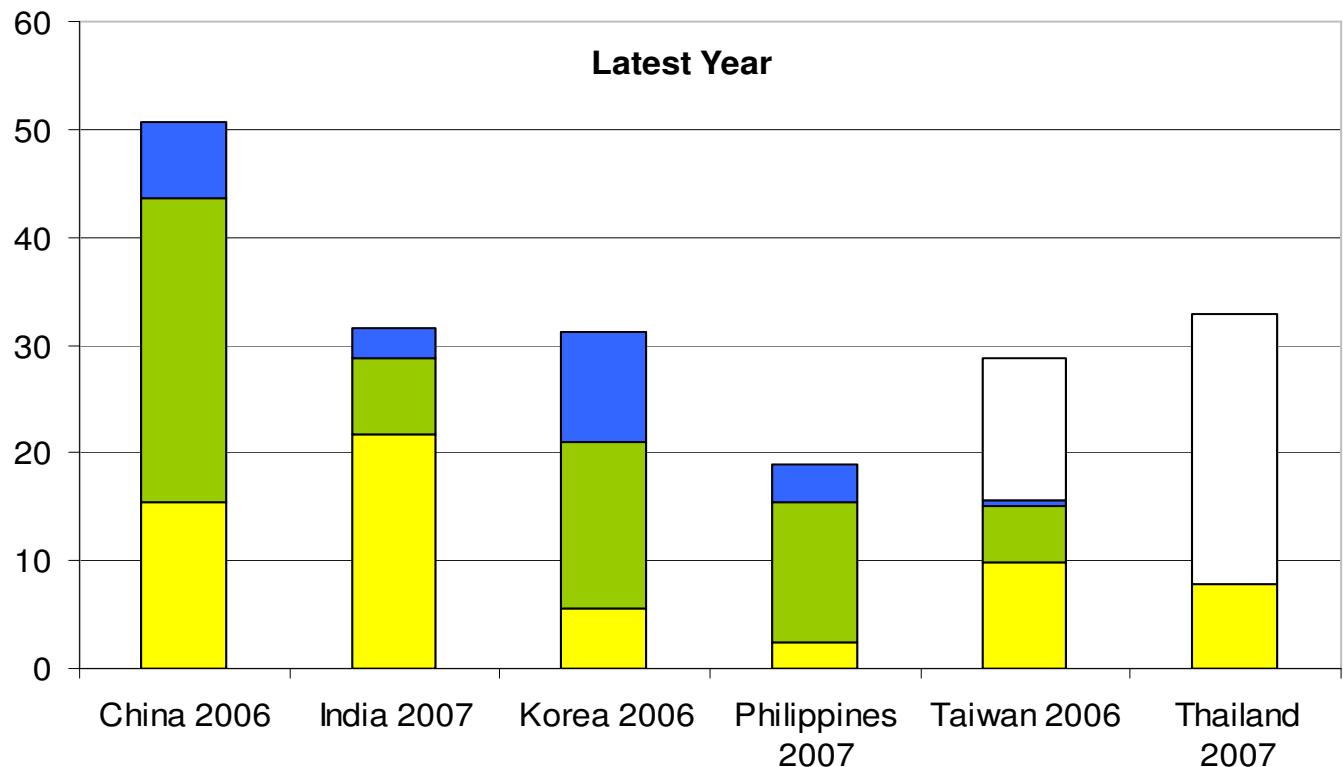

■ Gross national saving ■ Gross national investment □ Current account balance

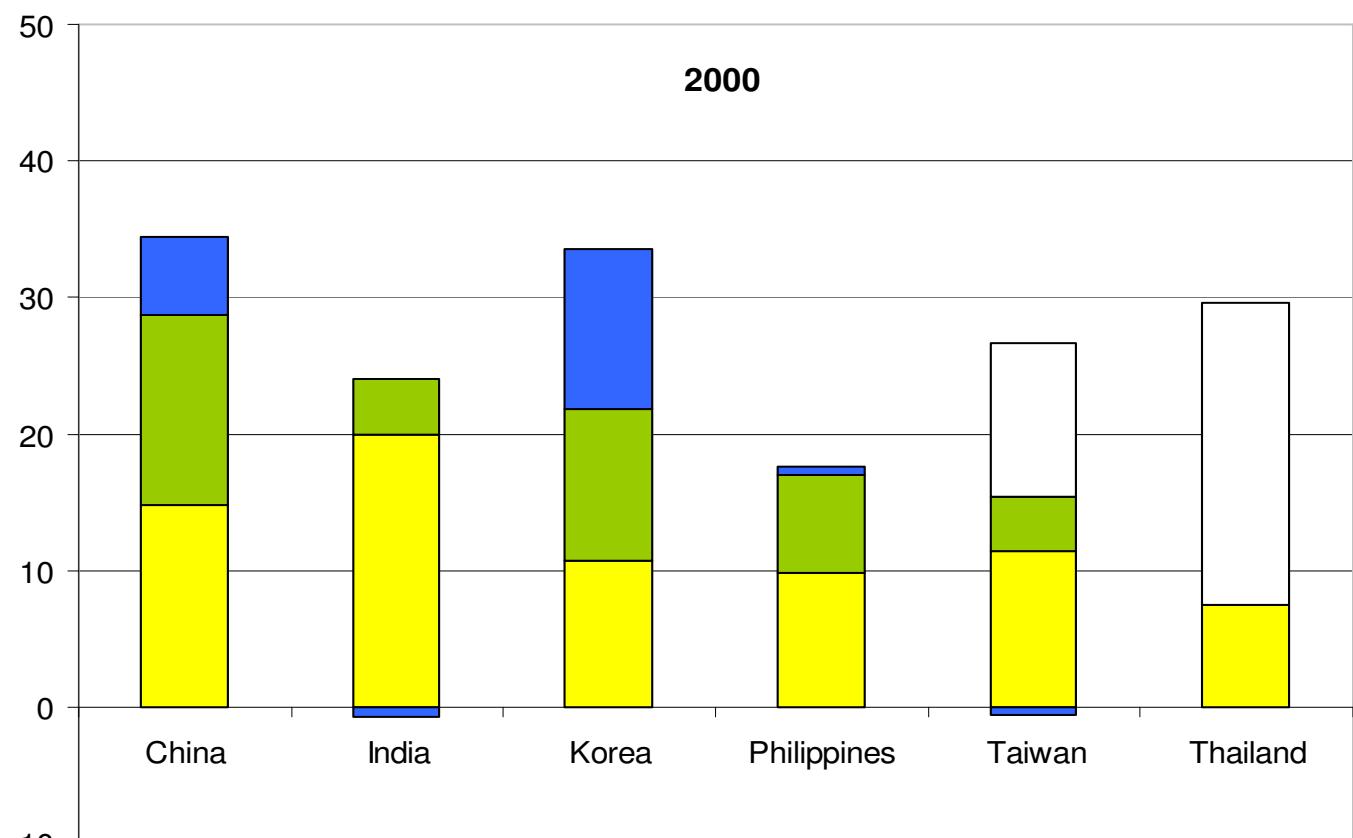

# **Composition of National Savings**

- Household savings
- Corporate savings
- Government savings

### Components of National Savings Rates (in percent of GDP)

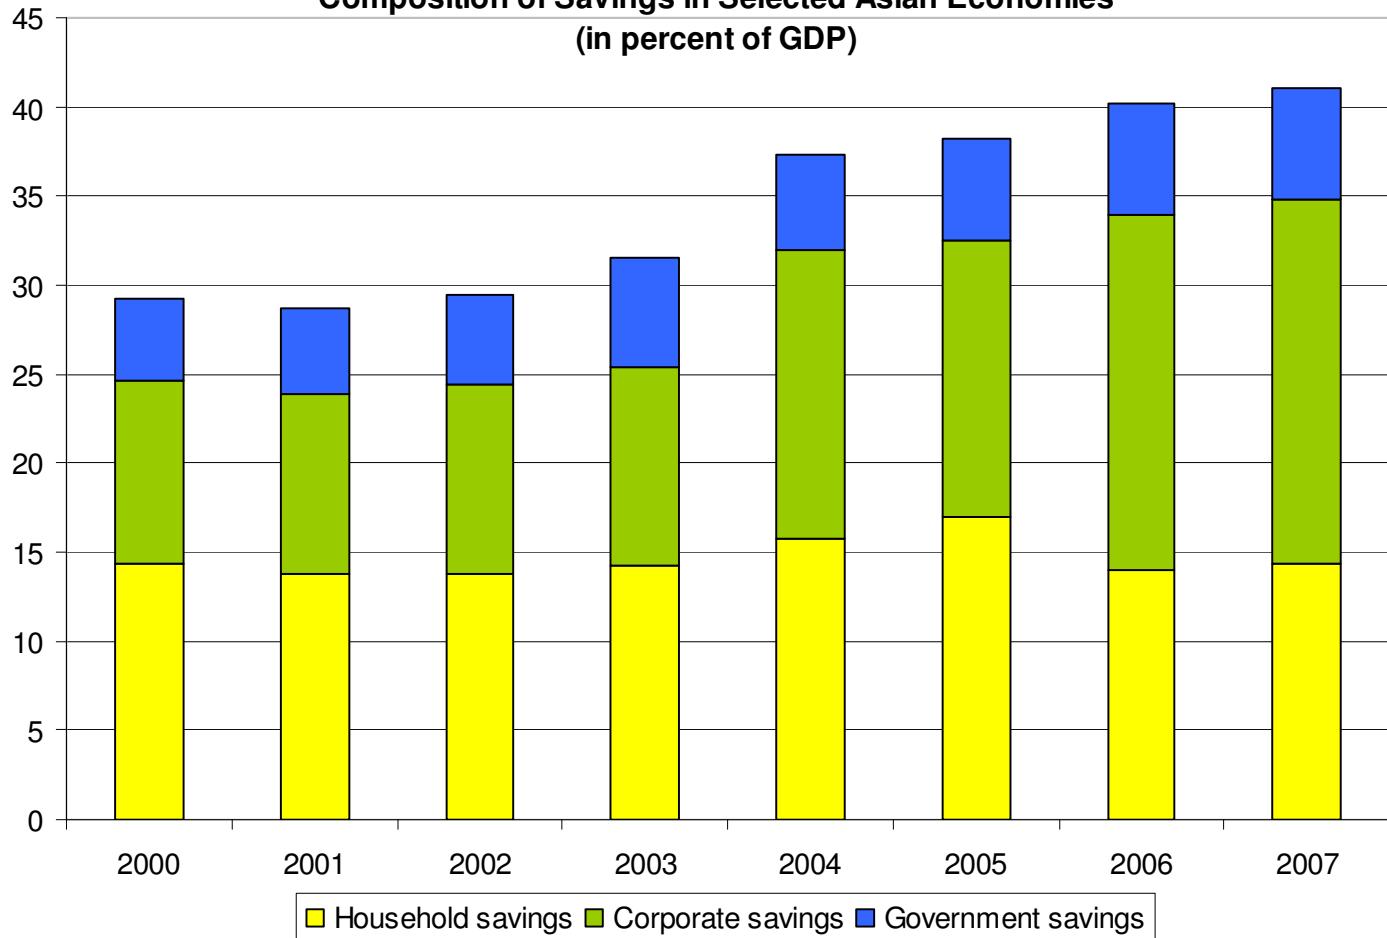

**2000**

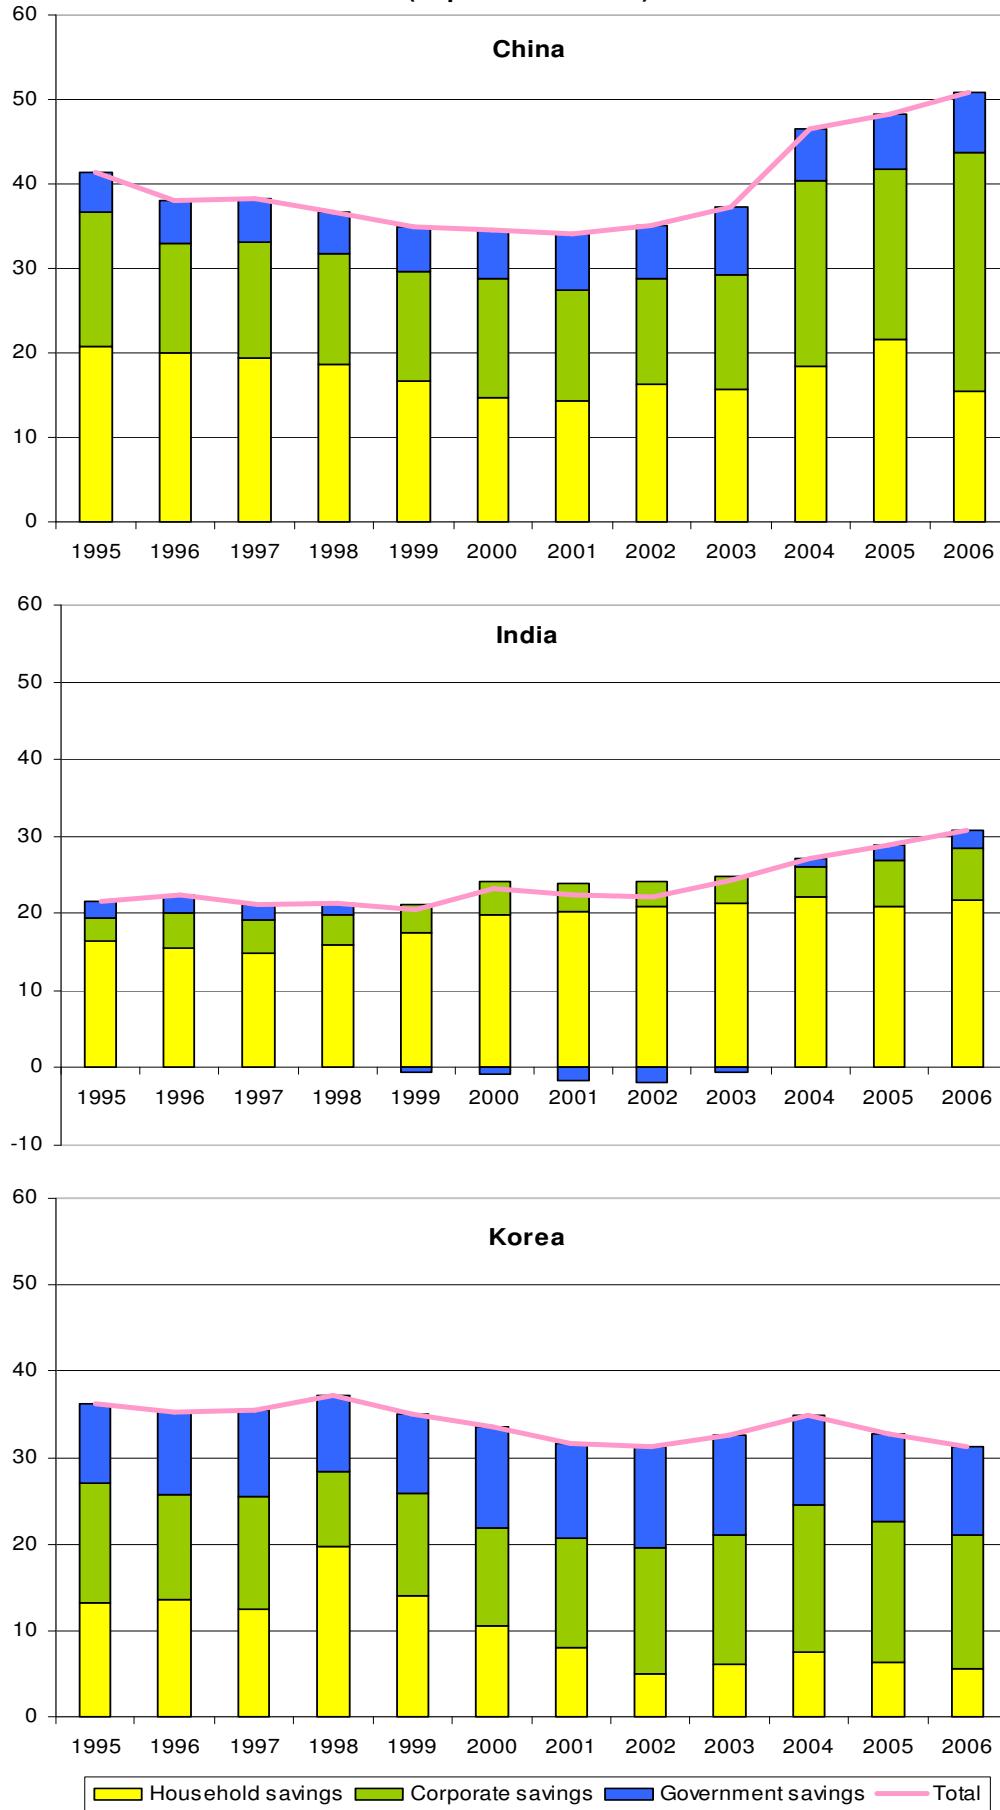

█ Household savings   █ Corporate savings   █ Government savings   █ Unallocated savings

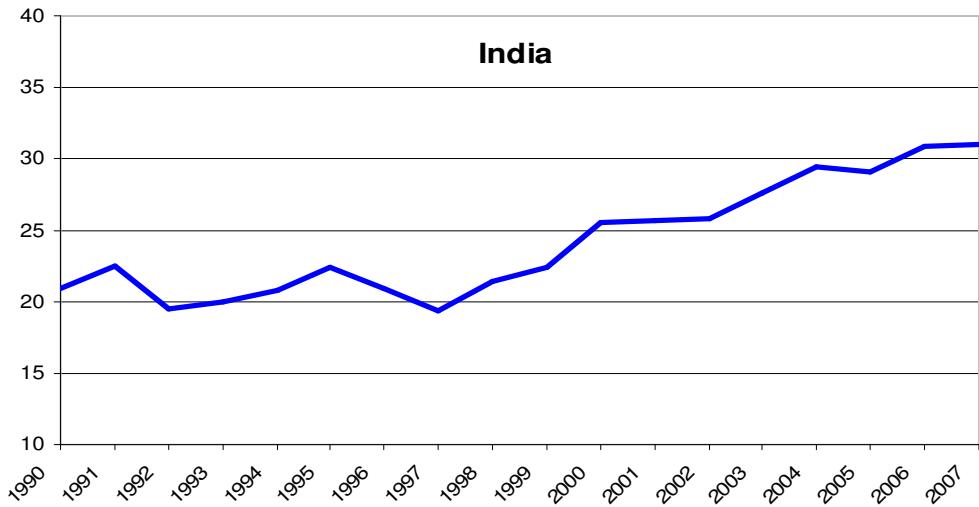

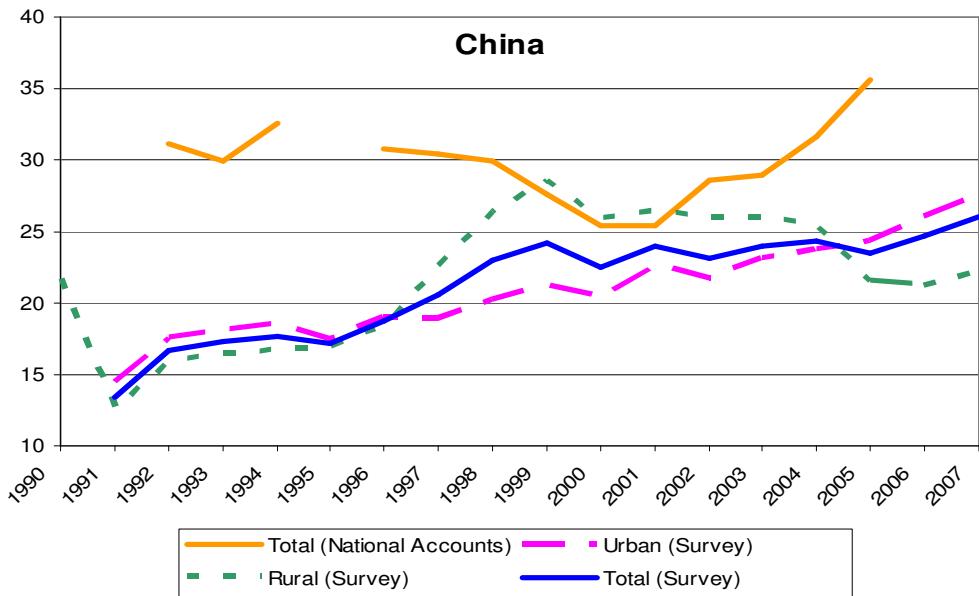

**Composition of Savings in Selected Asian Economies**  
(in percent of GDP)

**Composition of National Saving  
(in percent of GDP)**

### Household Saving Rates (as percent of household disposable income)

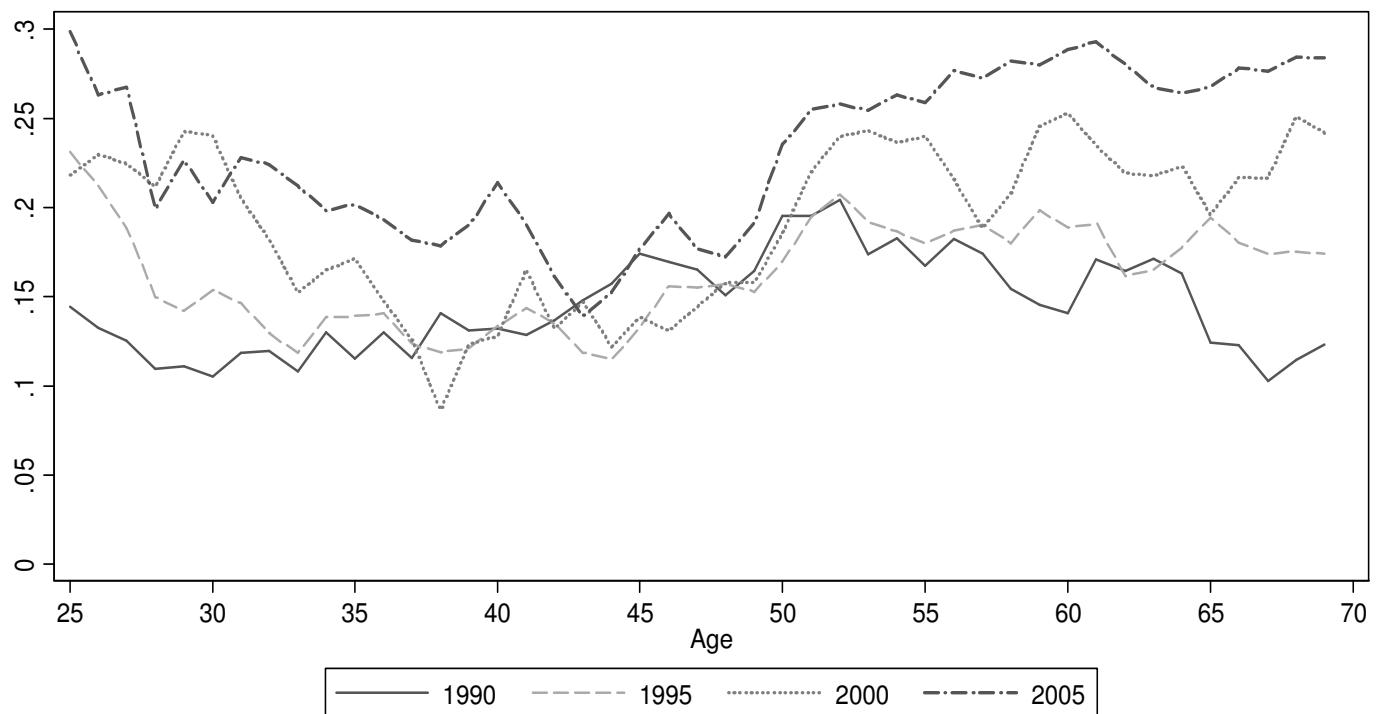

## A Case Study: China

Why are Saving Rates of Urban  
Households in China Rising?

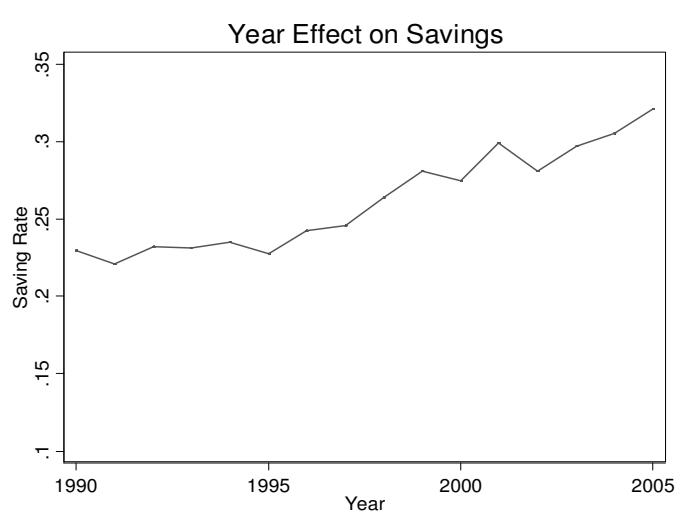

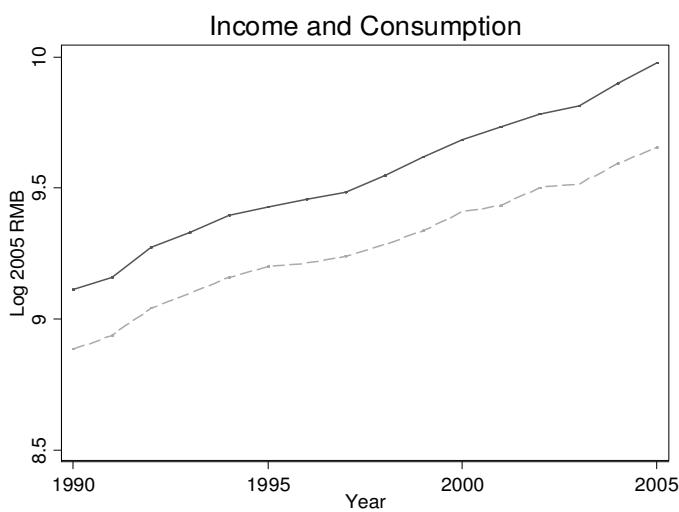

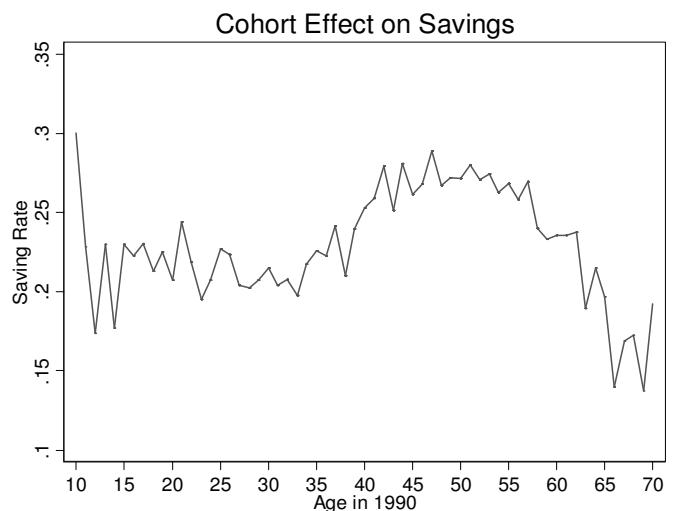

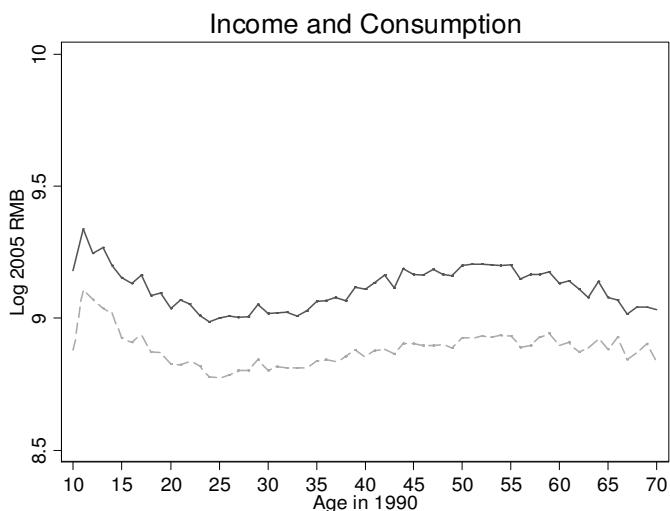

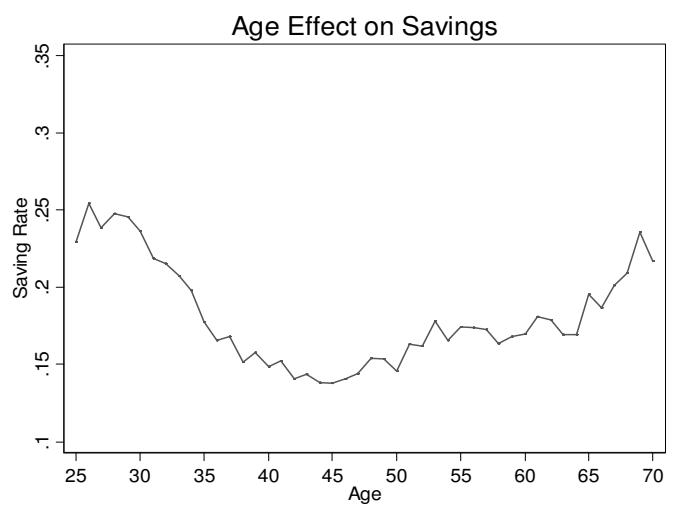

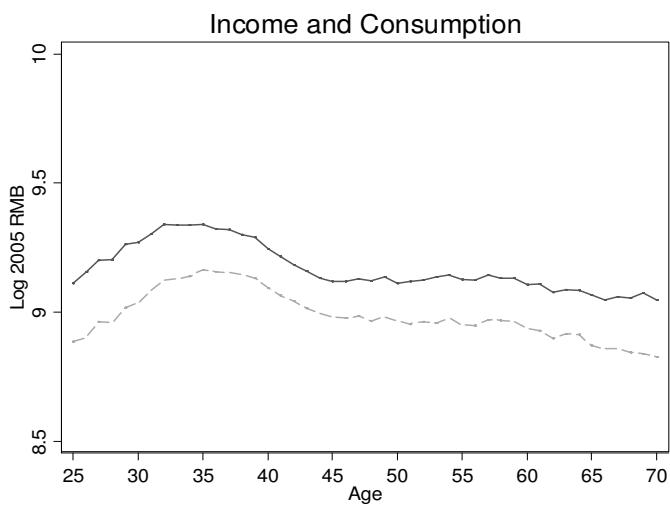

(Chamon and Prasad, *AEJ: Macro*, 2009)

## Average Saving Rates by Age of Head of Household

(Saving Rate = 1 – Consumption/Disposable Income)

## Age, Cohort, and Year Effects on Income, Consumption, and Saving Rates

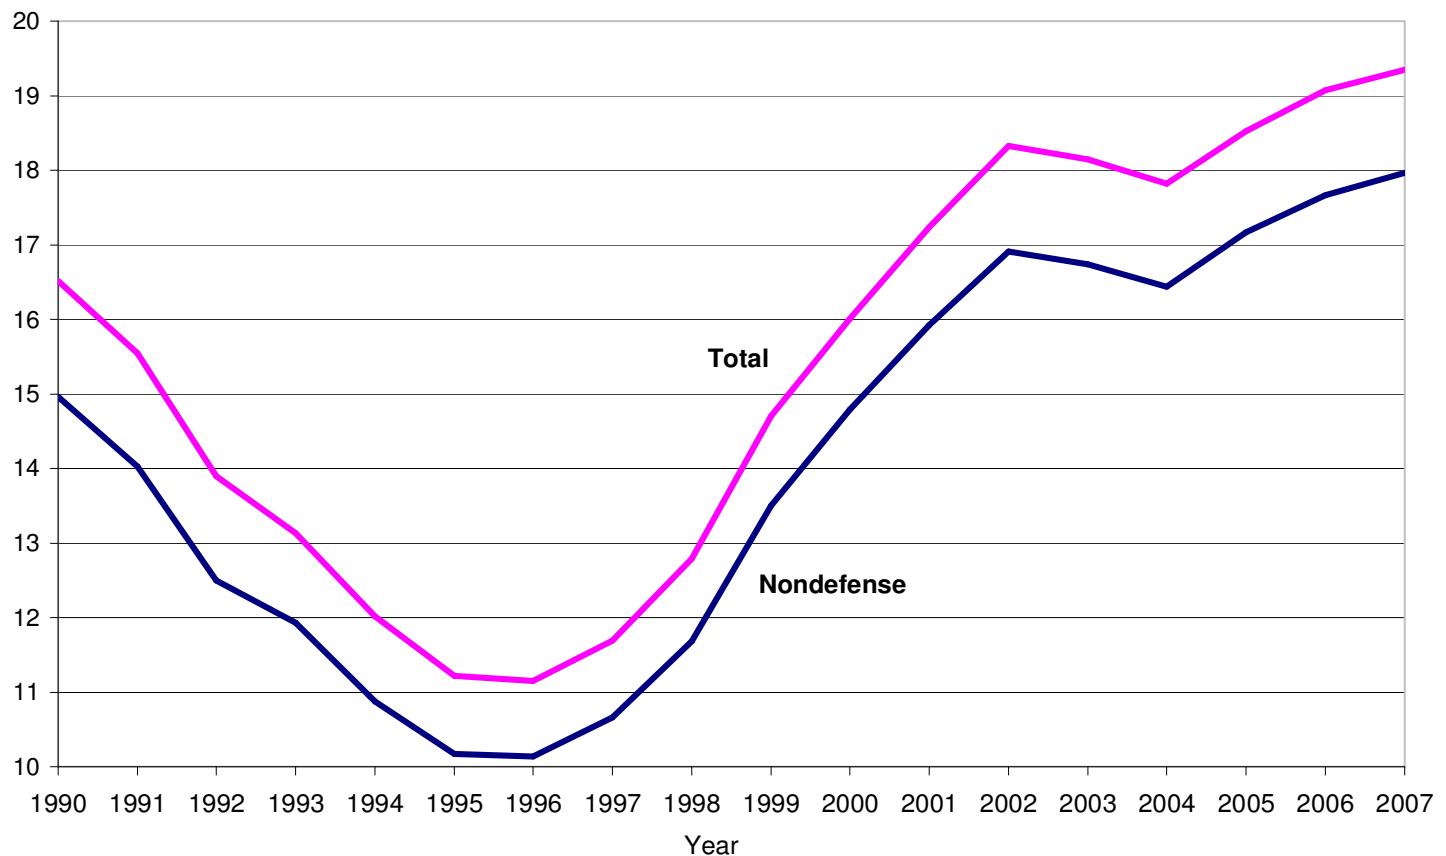

# Determinants of Rising Households Saving Rate in China

- Financial underdevelopment
- Rising private burden of health and education expenditures
- Precautionary motives, strengthened by financial repression

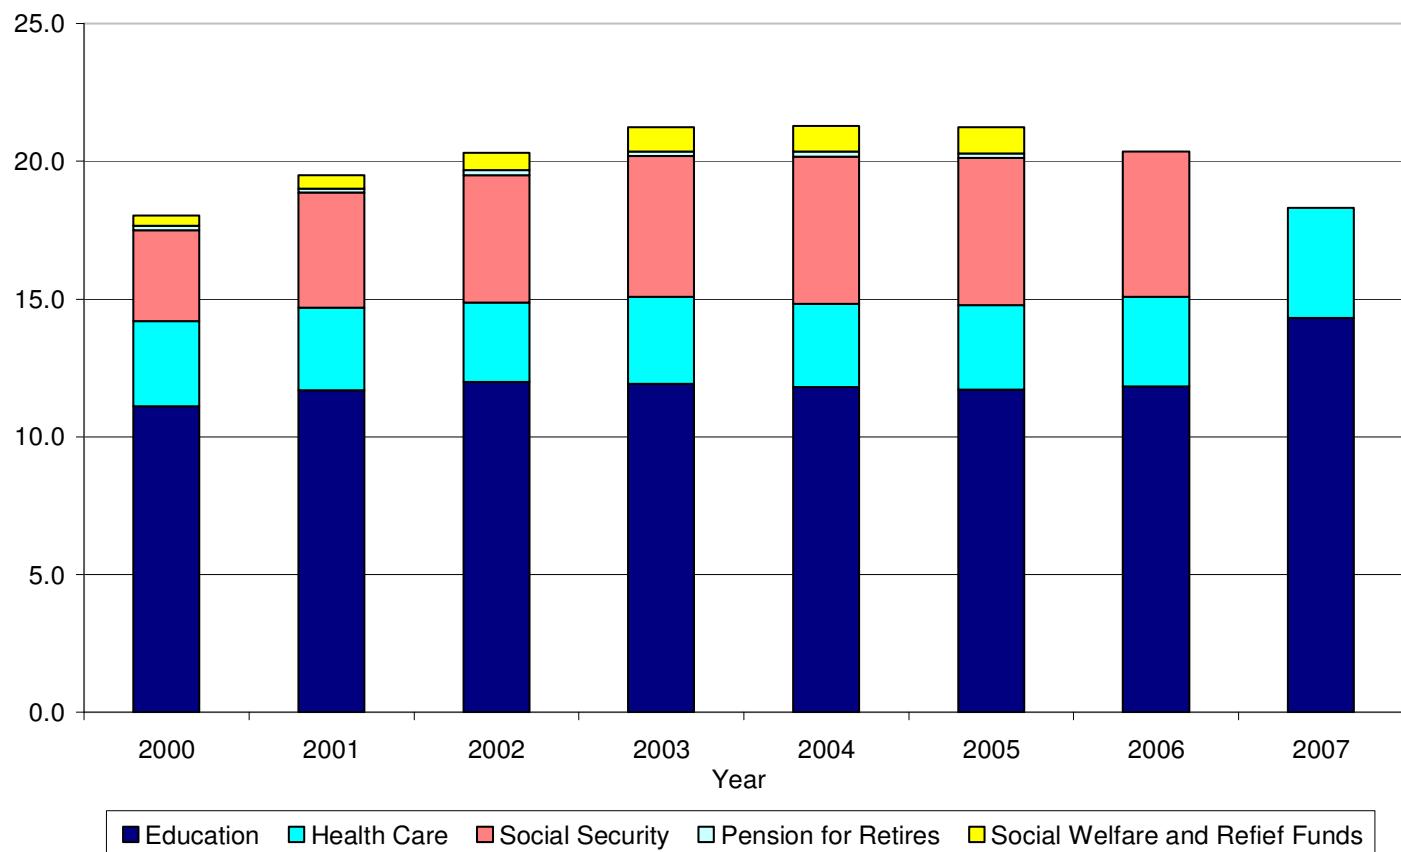

Not quantitatively important:

- Demographics
- Habit persistence
- Cultural factors

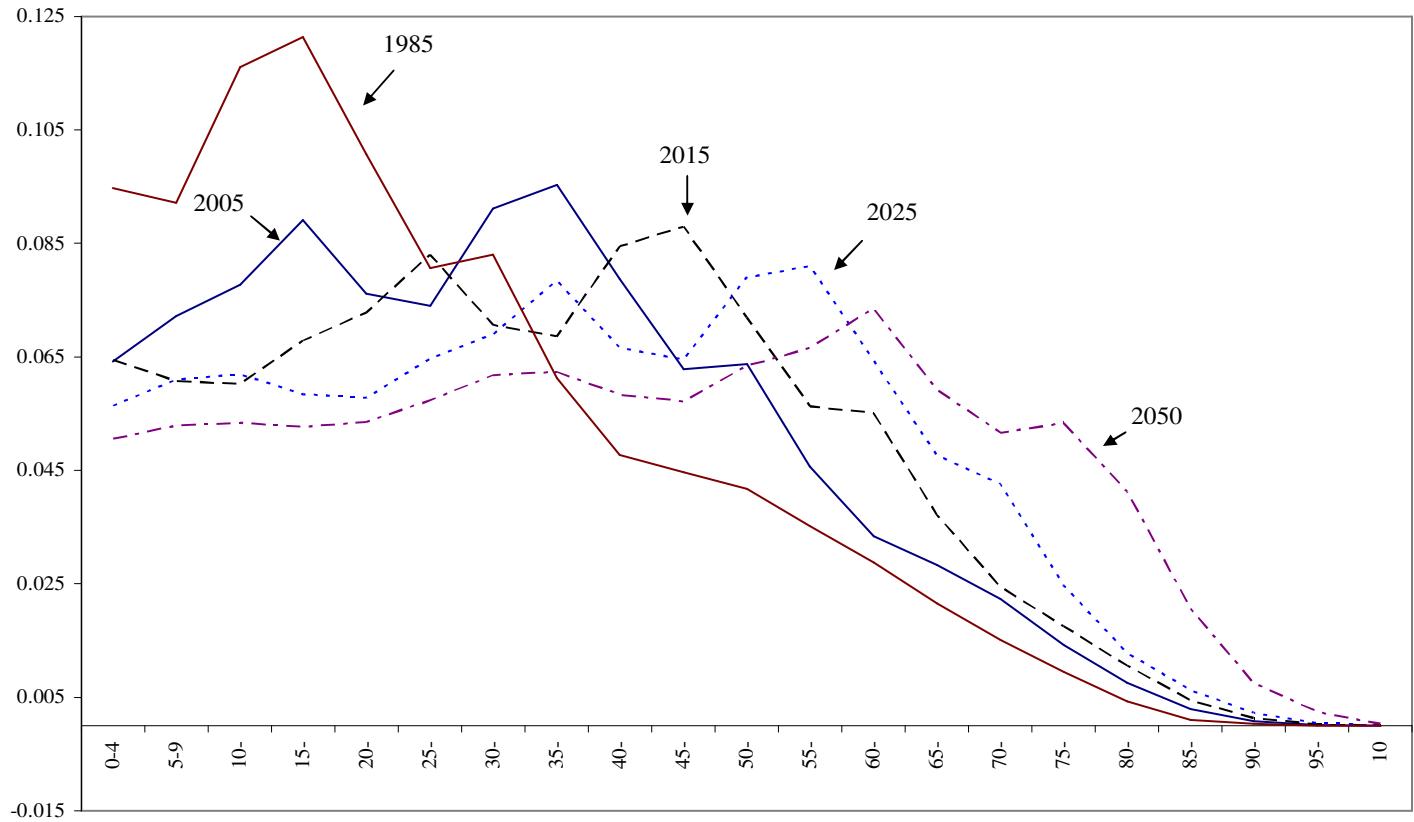

**China's Government Expenditure**  
**(in percent of GDP)**

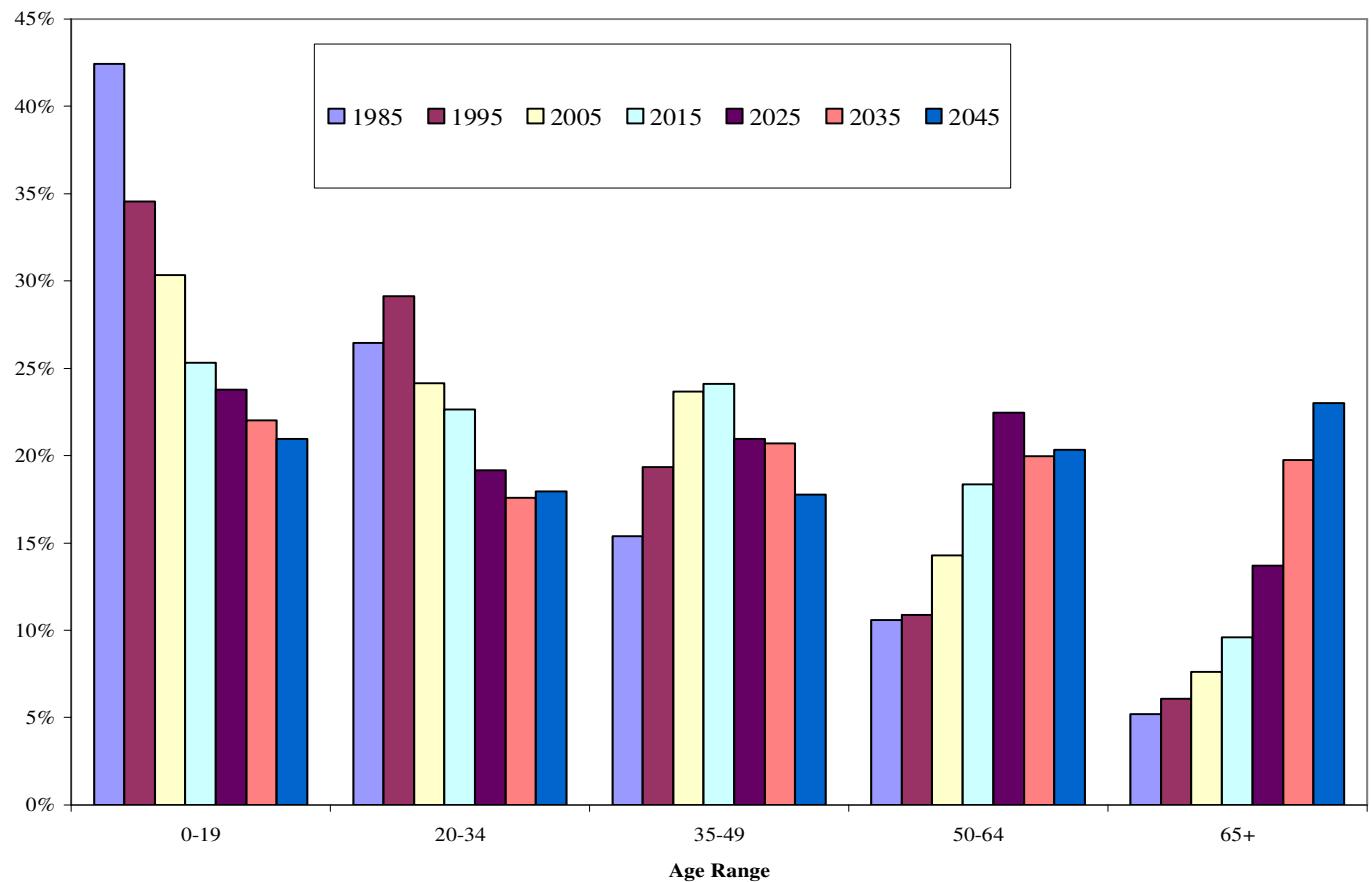

### China Government Expenditure Components (in percent of total government expenditure)

## Age Distribution of the Chinese Population: Estimates and Projections

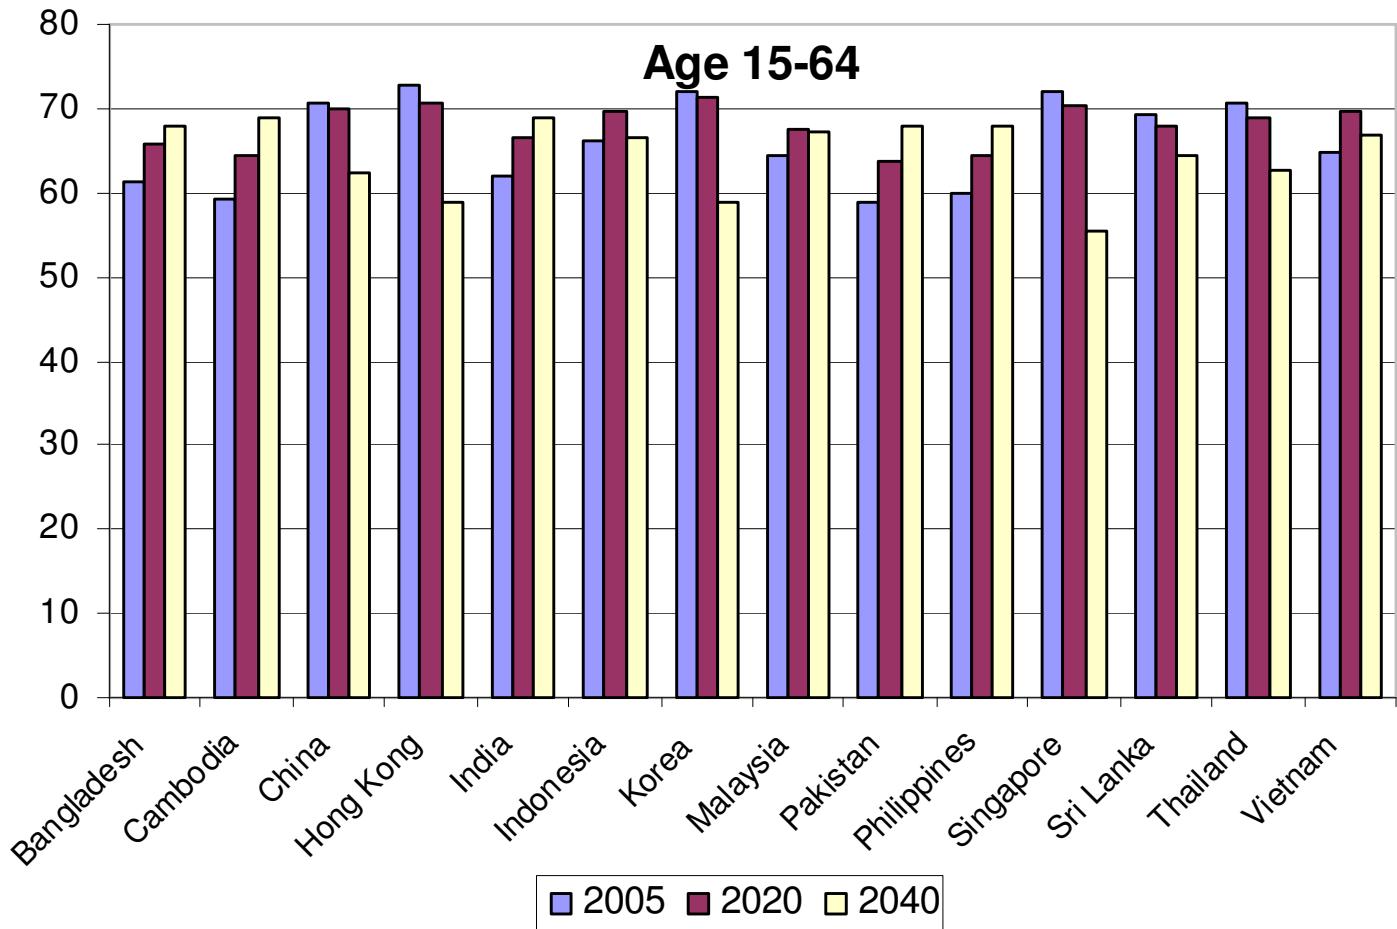

## Age Distribution of the Chinese Population: Estimates and Projections

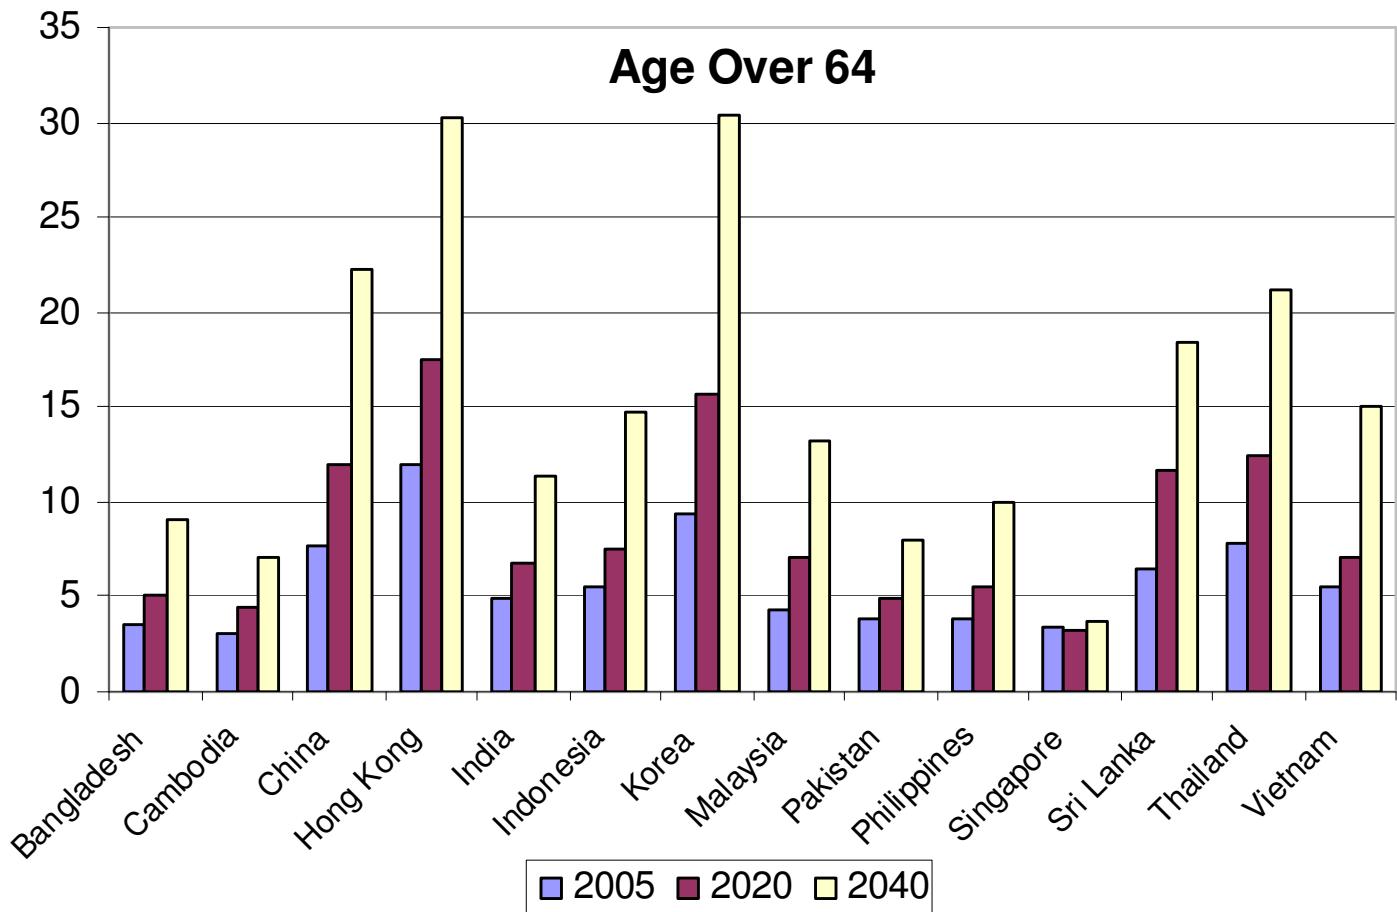

# Demographic Projections

## (shares of dependent and working-age populations in total population, in percent)

# Demographic Projections

## (shares of dependent and working-age populations in total population, in percent)

# **Financial Development and Savings**

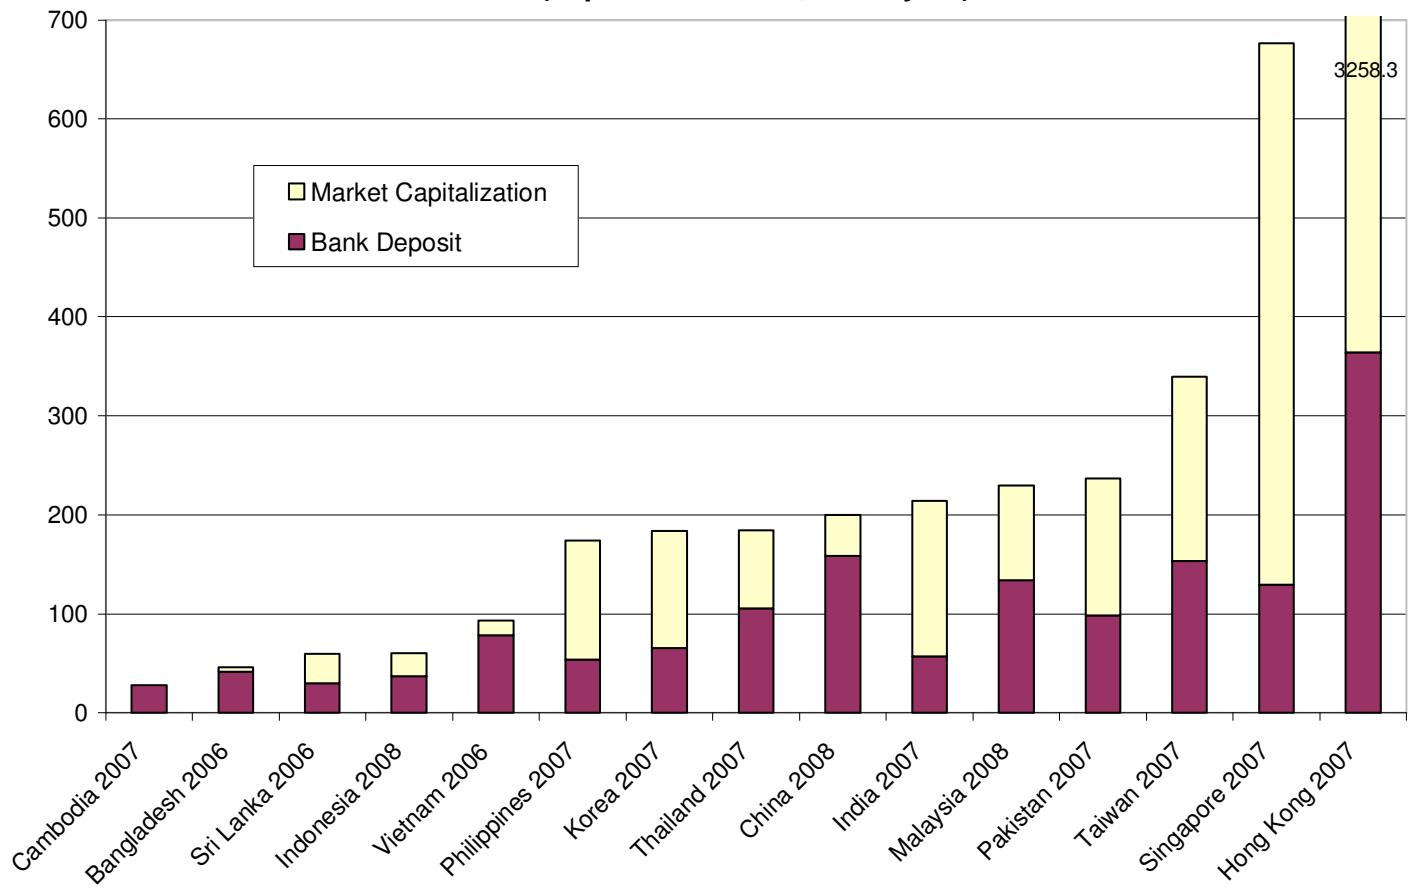

## *Households*

- Inability to borrow against future income
- Self insurance against shocks
- Lack of diversification opportunities
- Financial repression (low real returns)
- Exacerbated by greater macroeconomic and household-specific uncertainty

## *Firms*

- Saving by entrepreneurs
- Lack of alternatives to bank finance (e.g., corporate bond markets)
- Financial repression
- Poor corporate governance (no dividend payouts, profits reinvested)

### Bank Deposits and Stock Market Capitalization (in percent of GDP, latest year)

# Implications

- Financial market development
  - Broader set of markets
  - Financial system efficiency
  - Inclusion
- Social safety net
- Macro policies
- What does balanced growth look like?

Not:

- Falling share of labor income in labor-rich economy
- Slow rate of consumption, emp. growth relative to GDP growth
- Large current account imbalance
