Outline of Talk

- Getting behind the growth story
- Sustainability versus welfare
- Reforms in a broader context
- Risks, possible triggers for growth slowdown

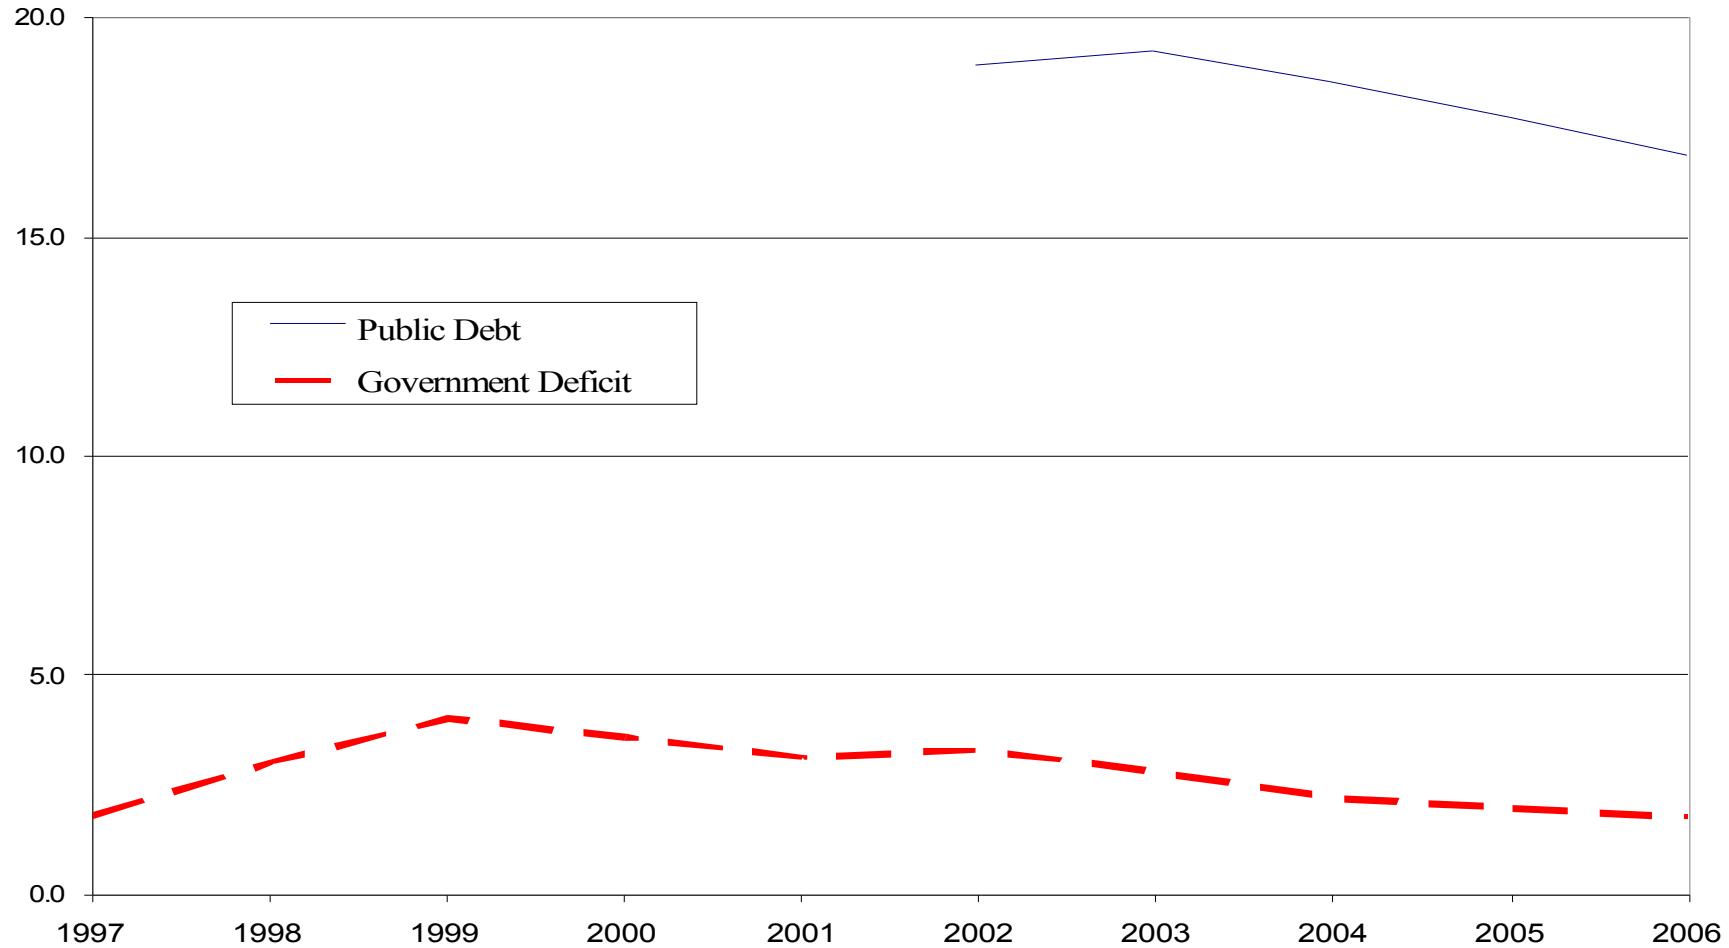

GDP Growth and CPI Inflation

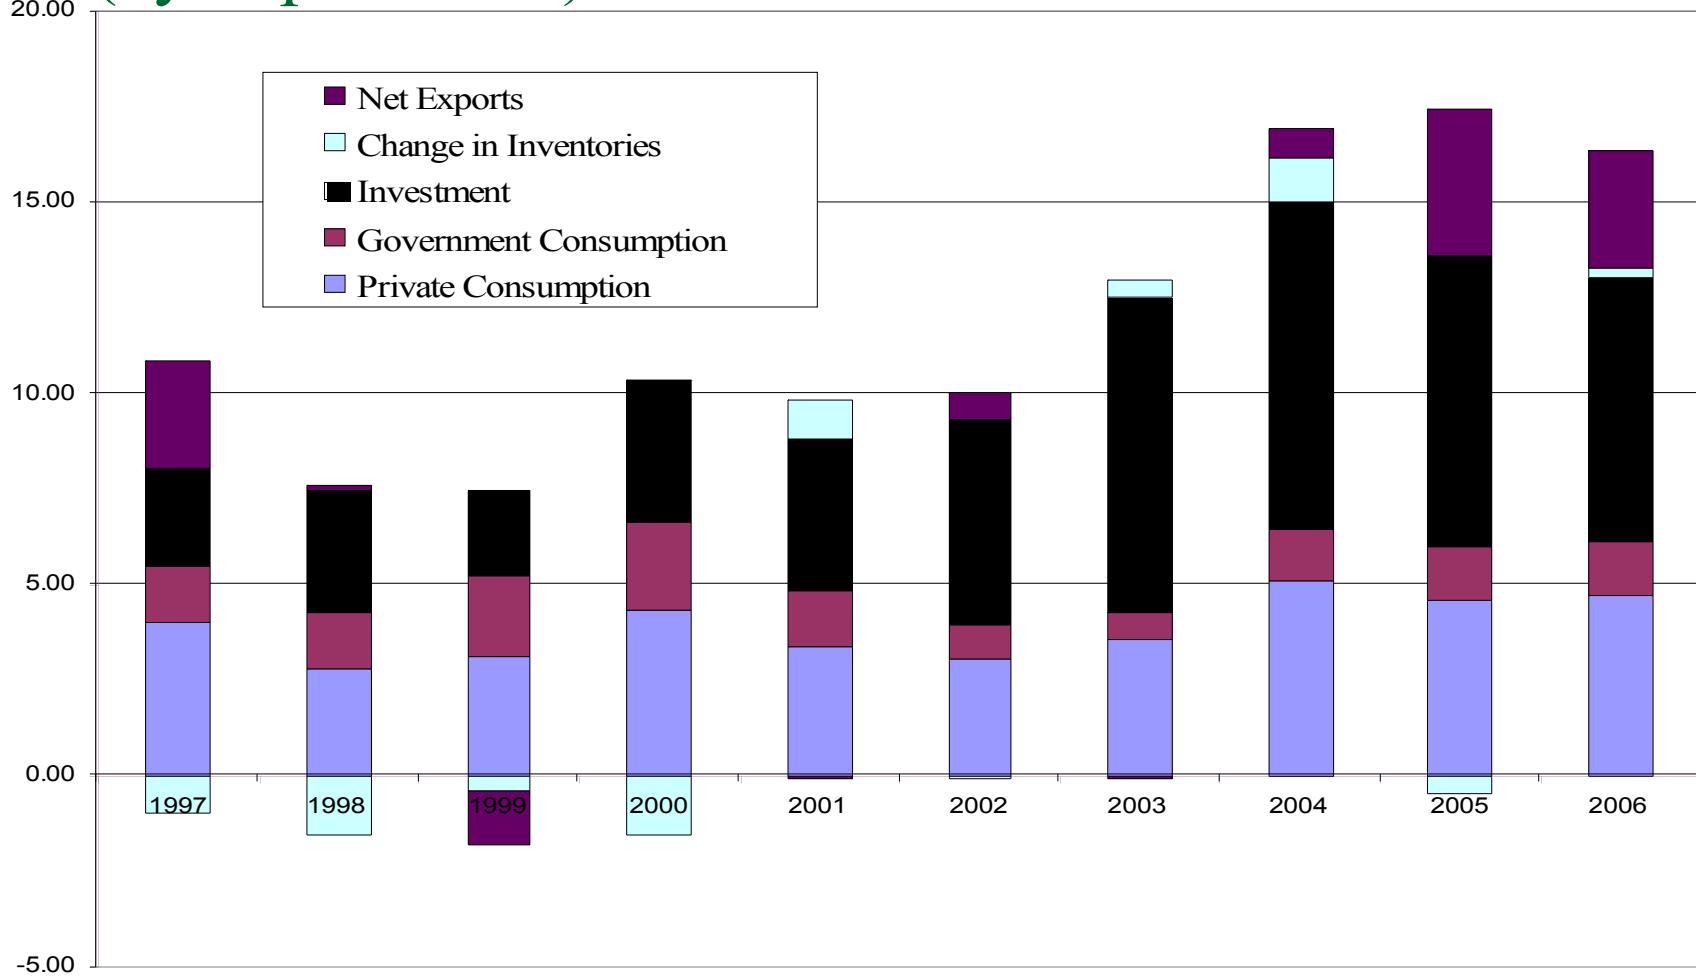

CPI Inflation (year on year)

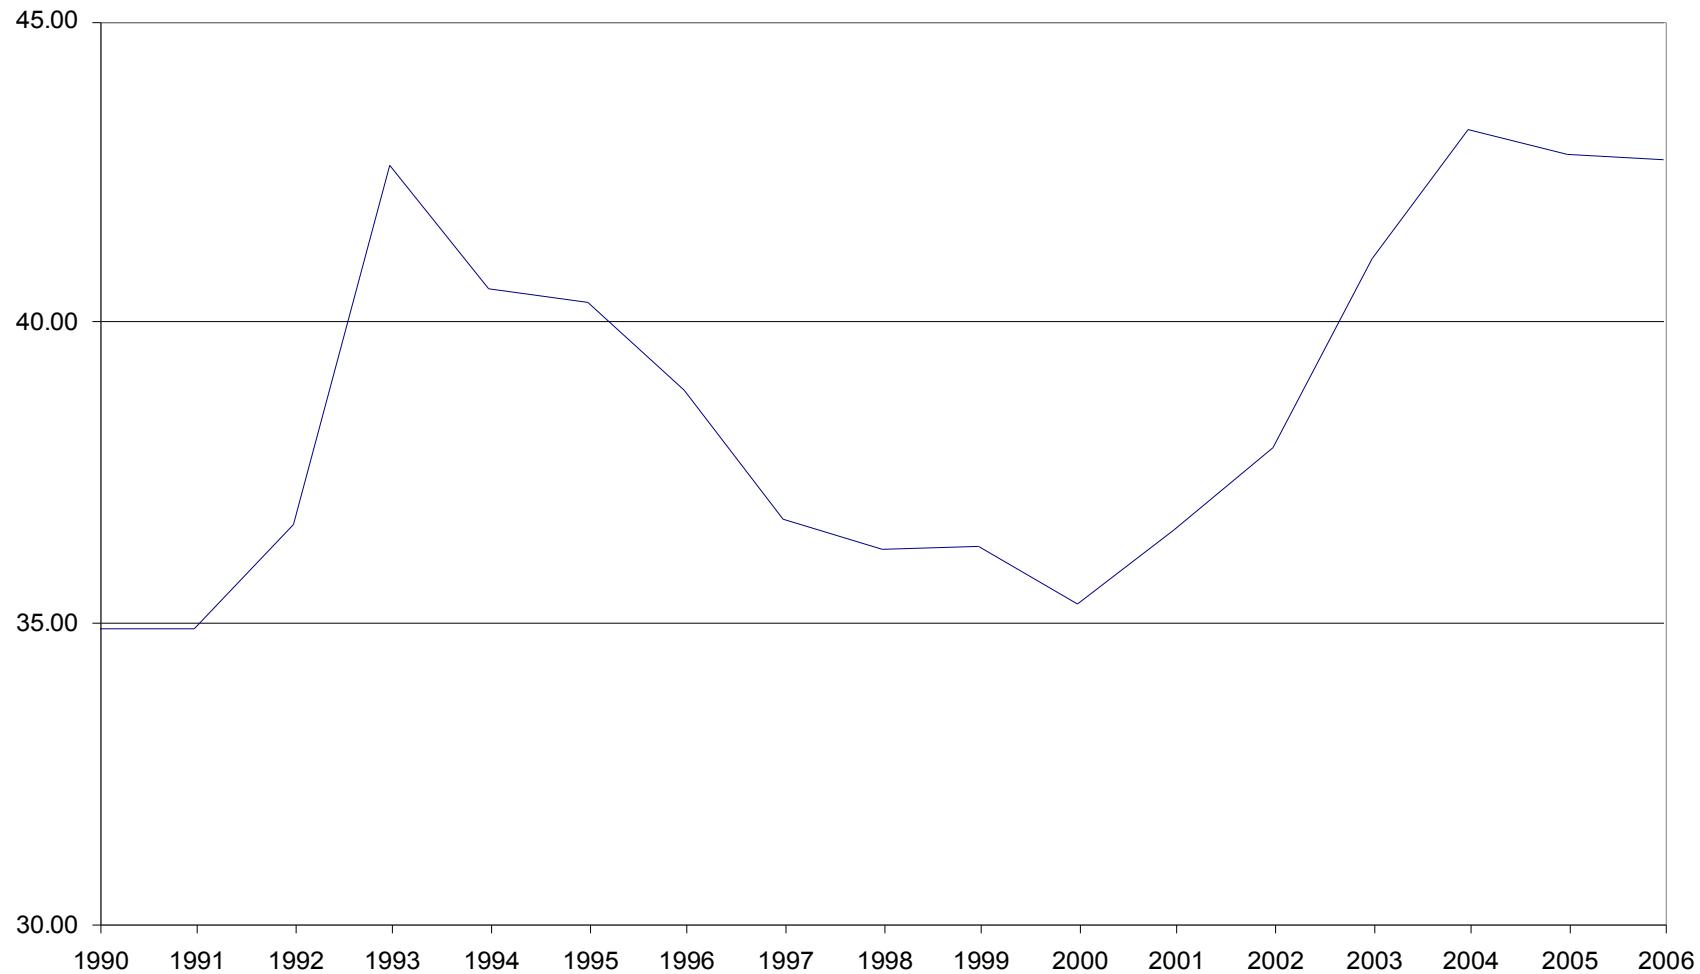

Government Deficit and Public Debt (in percent of GDP)

Contributions of GDP Components (by expenditure) to China's Nominal GDP Growth

Capital Formation

The Sectoral Composition of GDP Growth

Year	GDP Growth	Sectoral Shares in GDP			Sectoral Contributions to Aggregate GDP Growth		
		Primary	Secondary	Tertiary	Primary	Secondary	Tertiary
1991	9.2	17.5	52.6	29.9	0.4	6.4	2.4
1995	10.9	12.3	60.6	27.1	0.6	7.8	2.6
2000	8.4	9.5	62.8	27.7	0.2	5.6	2.6
2001	8.3	9.0	62.8	28.2	0.3	5.2	2.8
2002	9.1	8.4	63.1	28.5	0.3	6.0	2.9

Weak Employment Growth

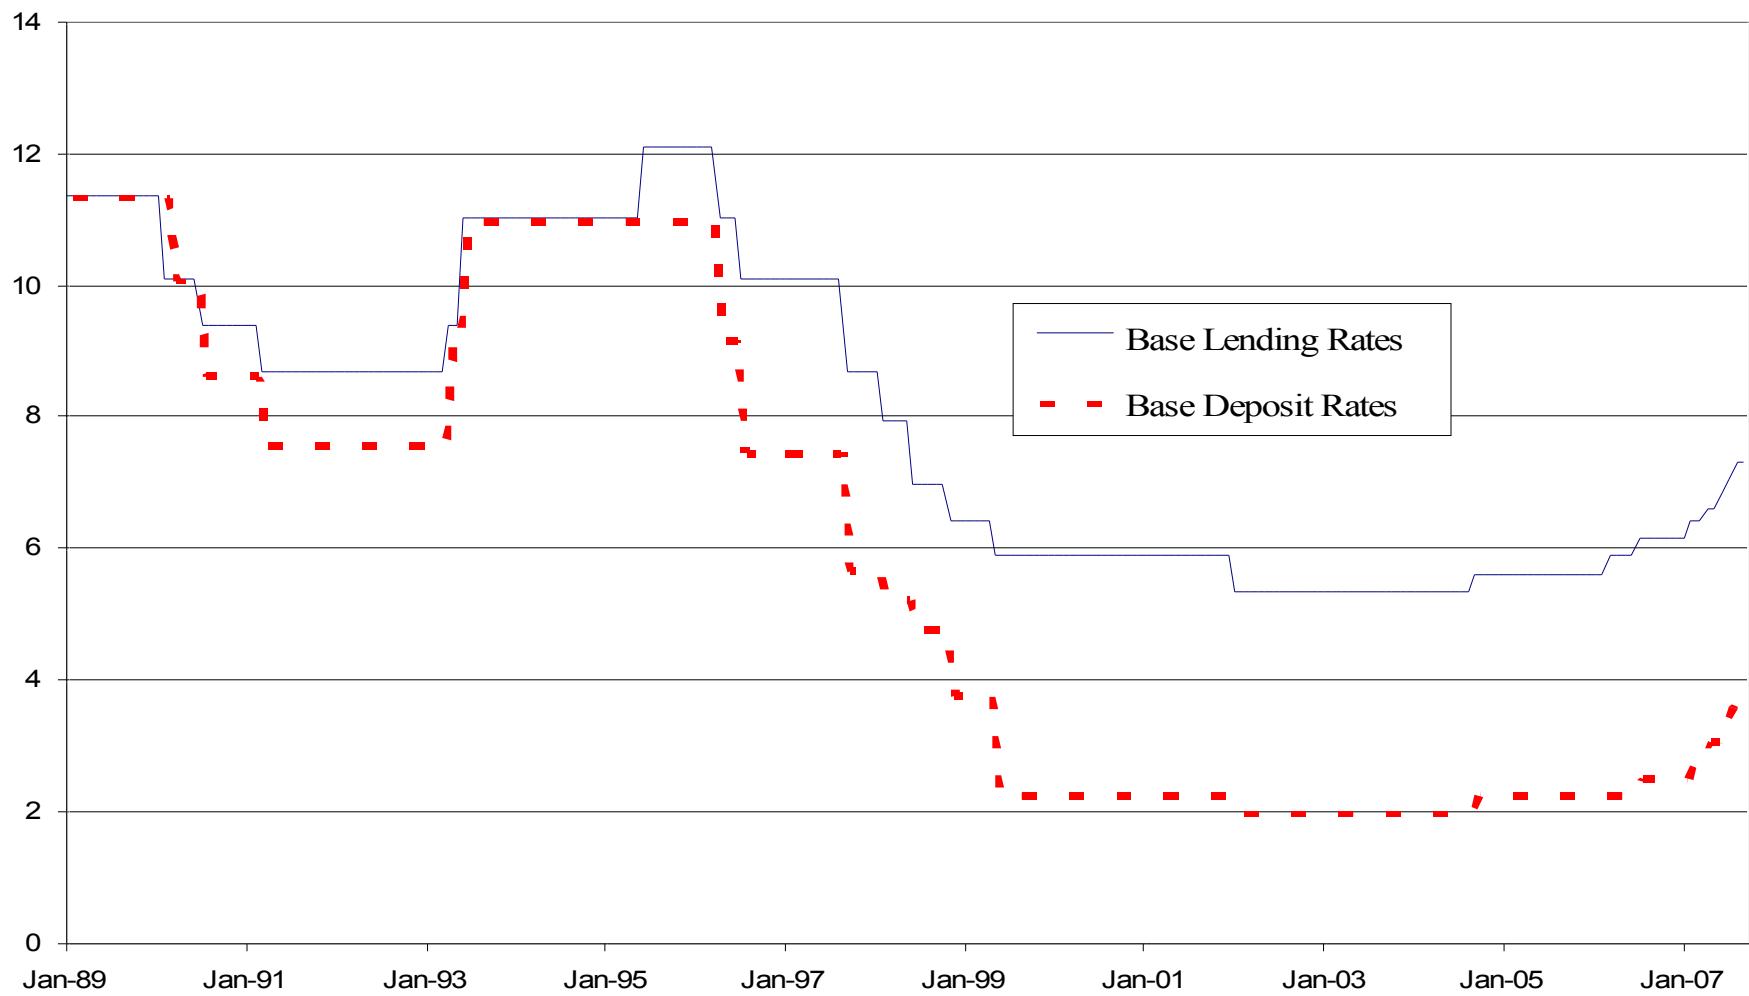

Average
2000-06

GDP growth	9.6
Employment growth	1.0
Industry: output growth	10.8
Industry: employment growth	2.3

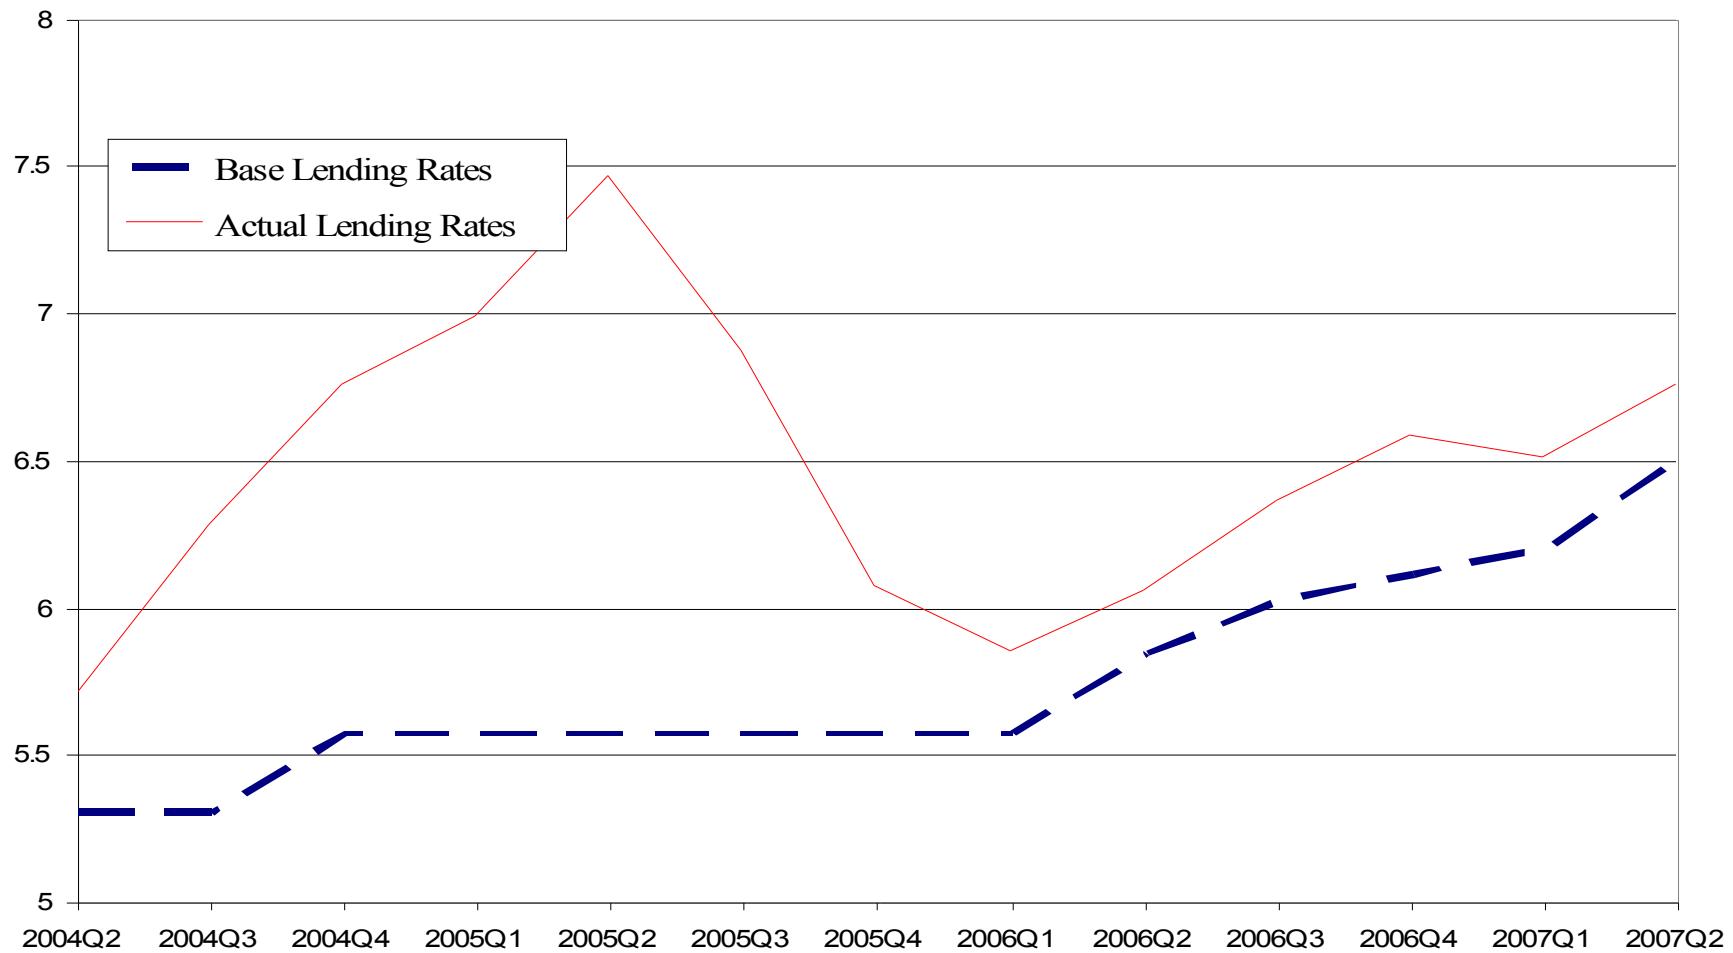

Savings-Investment Balance

- High level of investment financed by cheap credit, retained earnings
- High household and corporate savings
- So still large current account surpluses

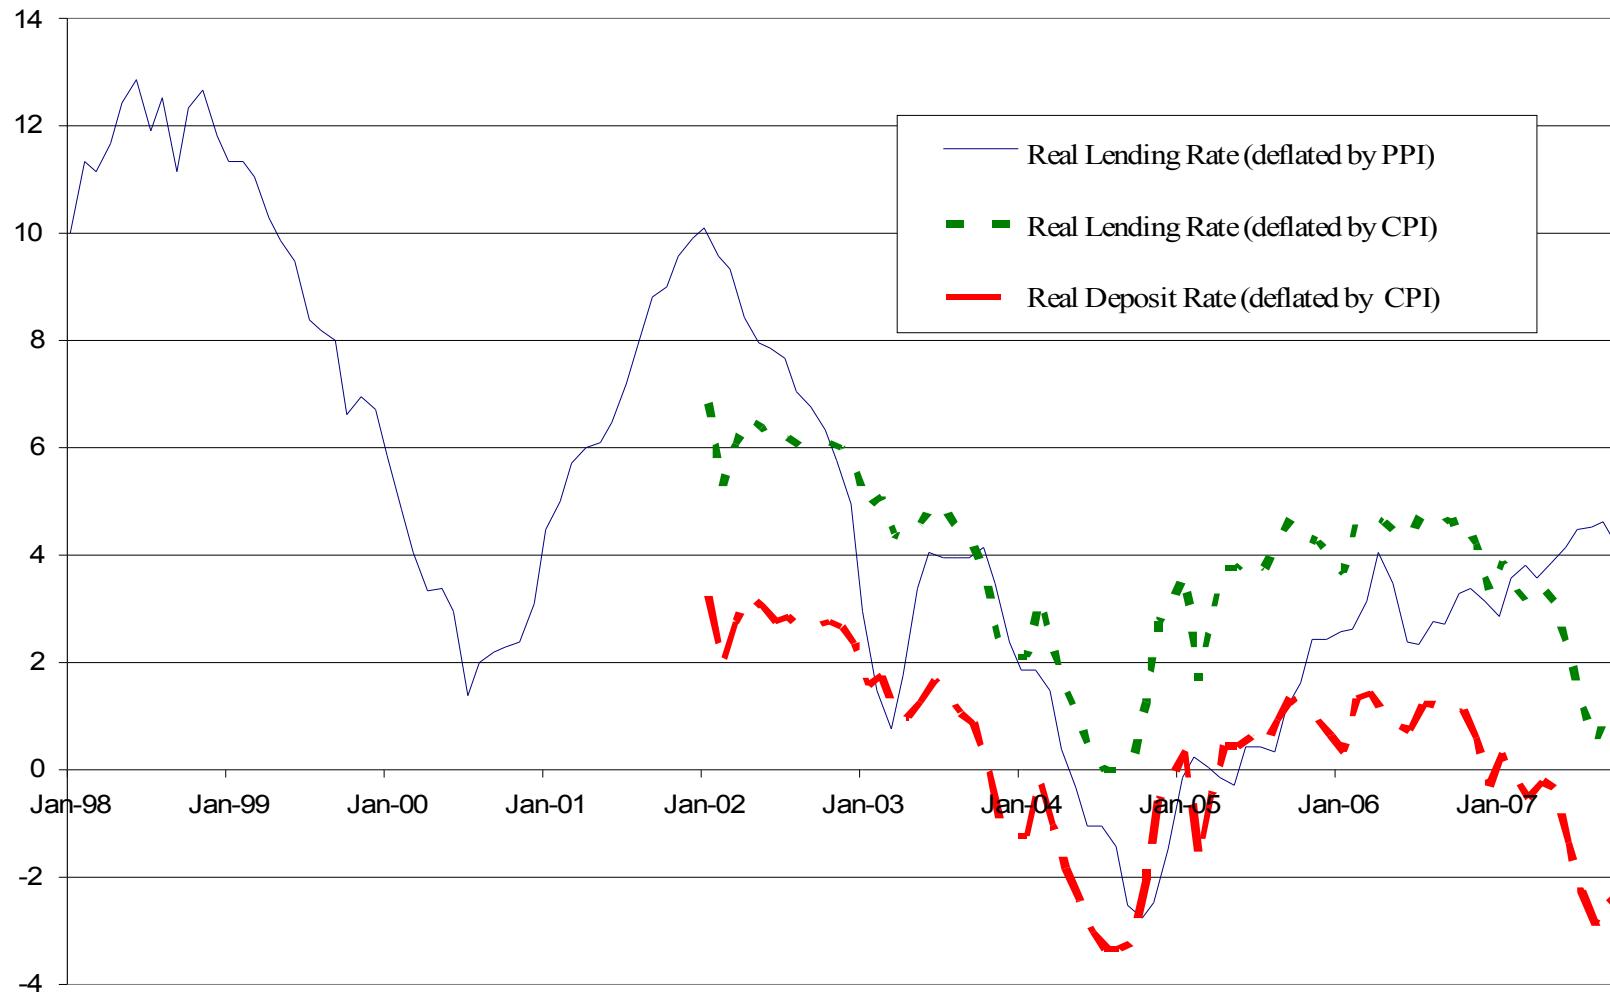

Base Lending and Deposit Rates (1-year rates, in percent)

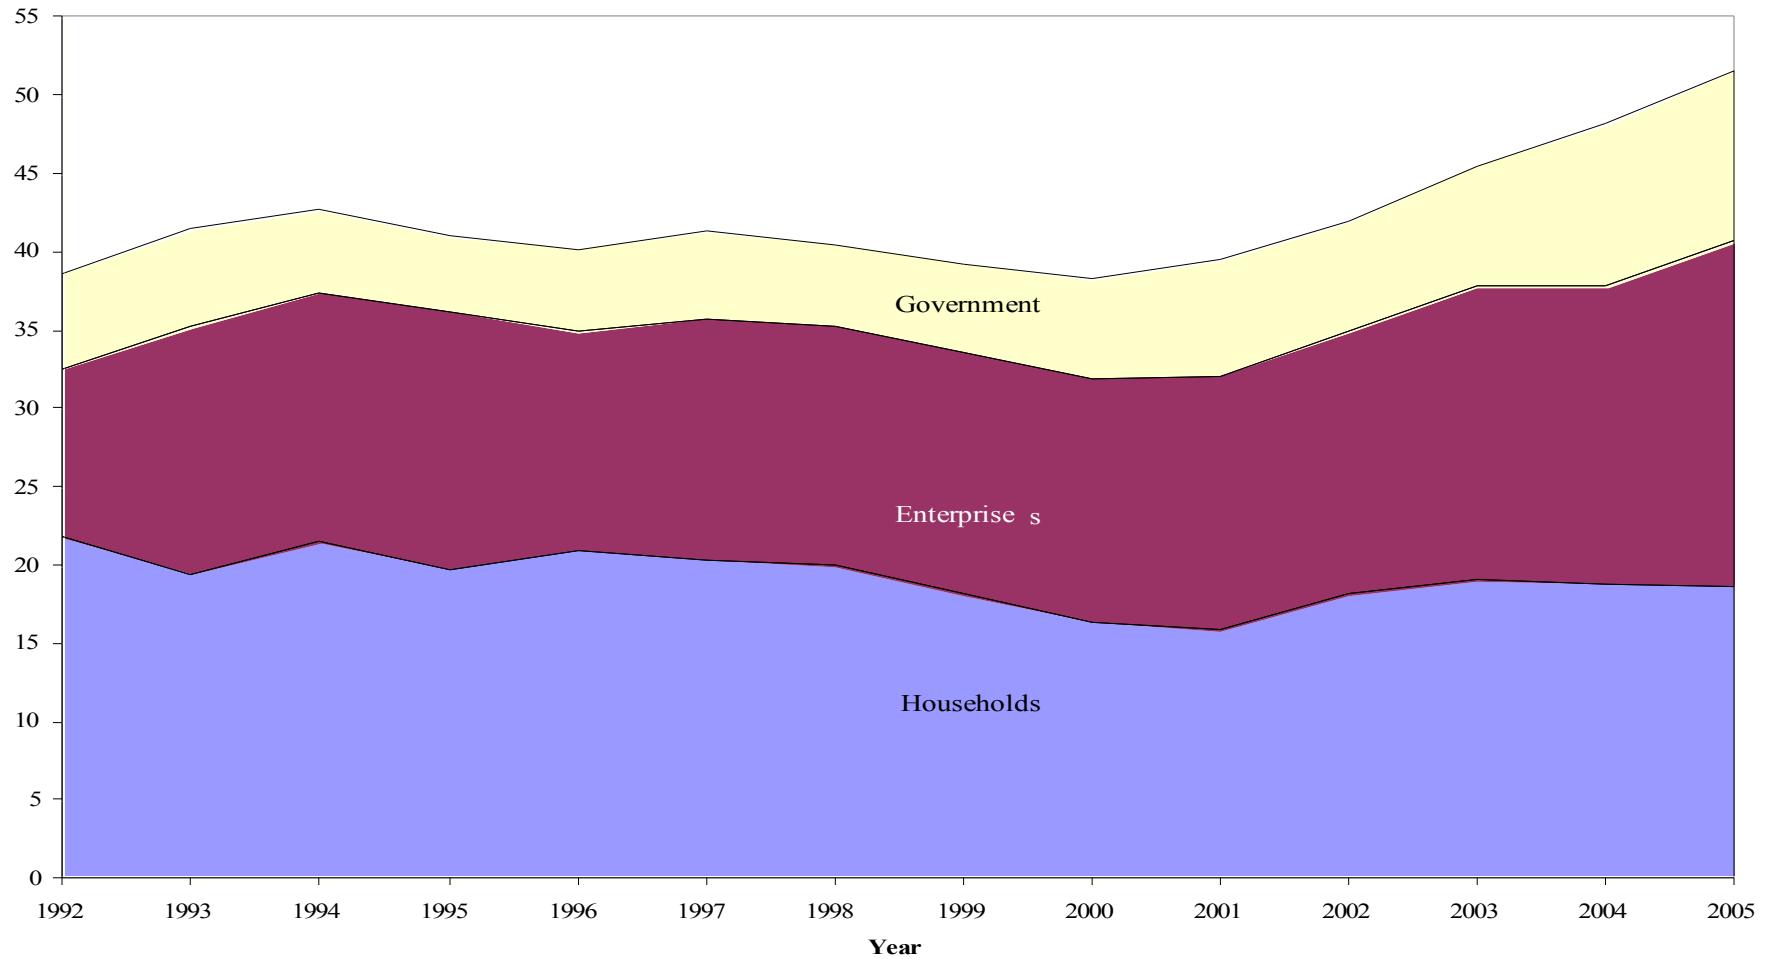

Base and Actual Lending Rates (1 year, in percent)

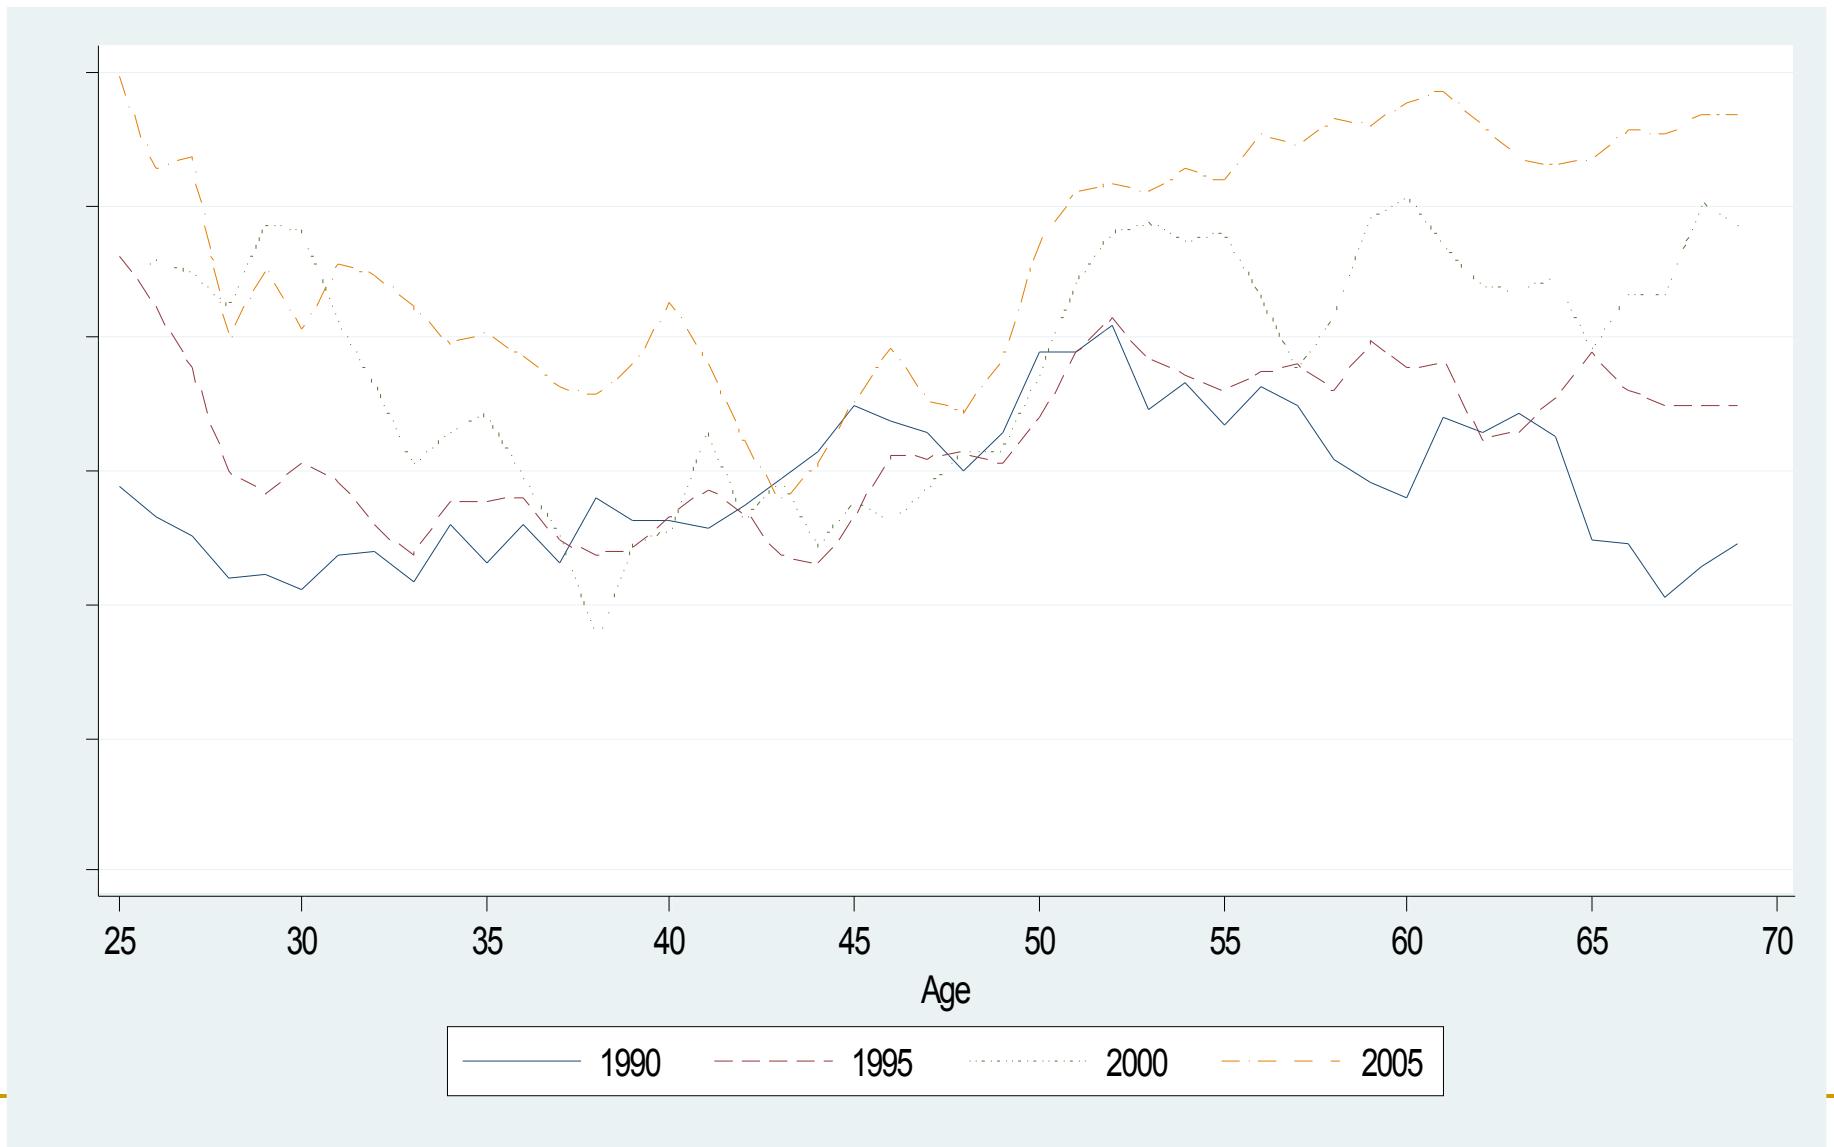

Real Lending and Deposit Rates (1-year rates, in percent)

Contributions to Gross Domestic Savings as a Percentage of GDP

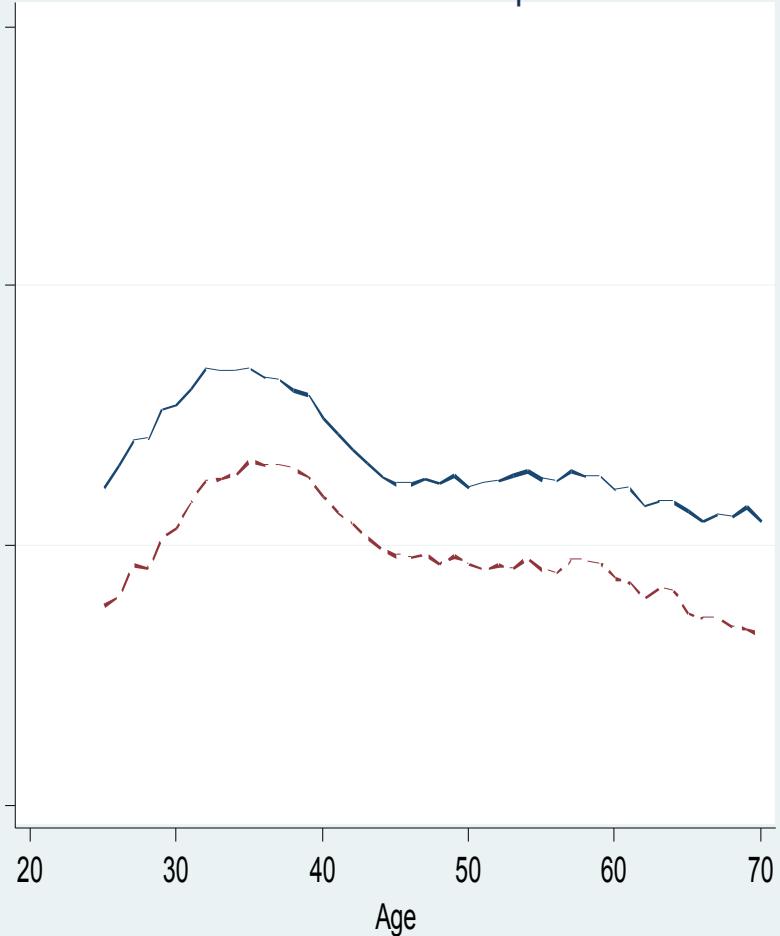

Average Saving Rates by Age of Household Head

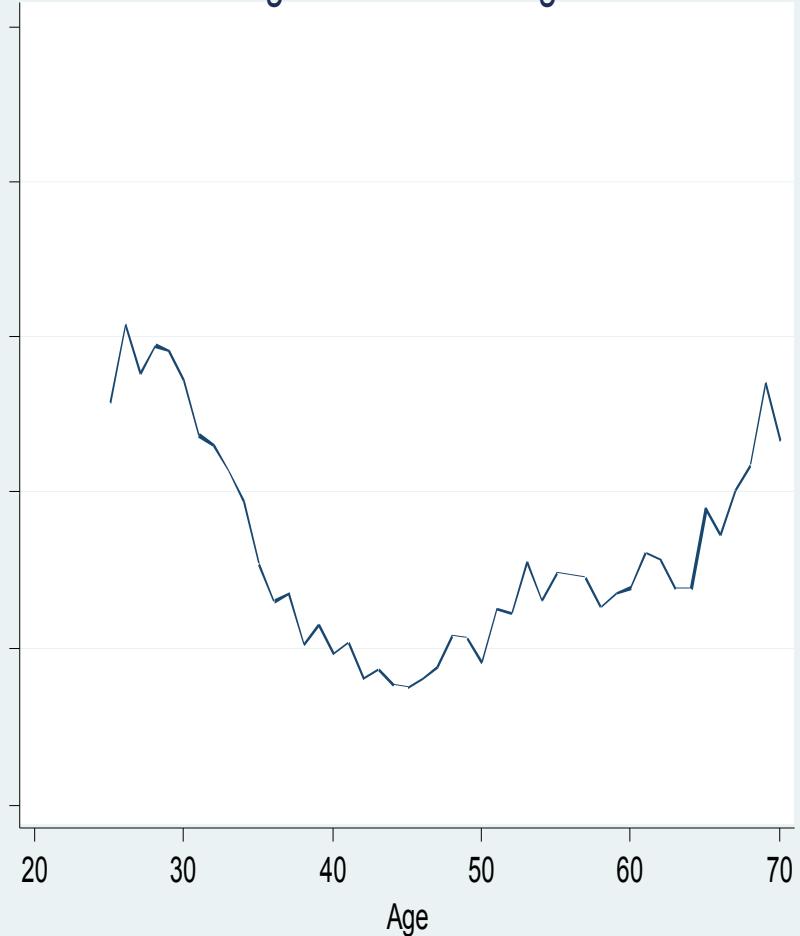

Age Effects on Income, Consumption, and Saving Rates

Income and Consumption

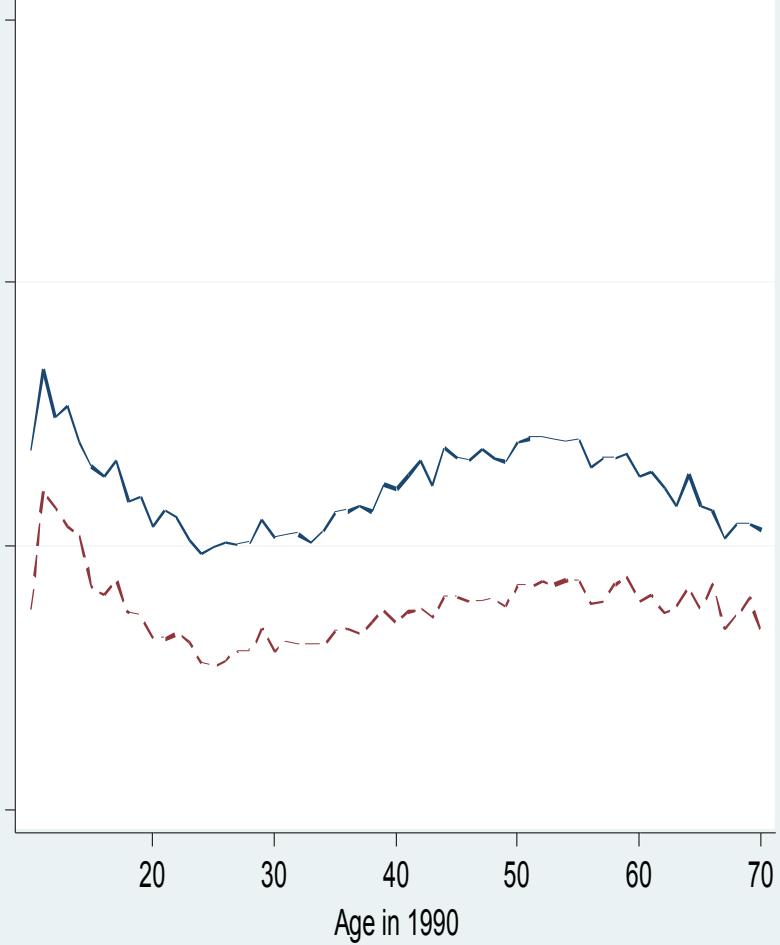

Age Effect on Savings

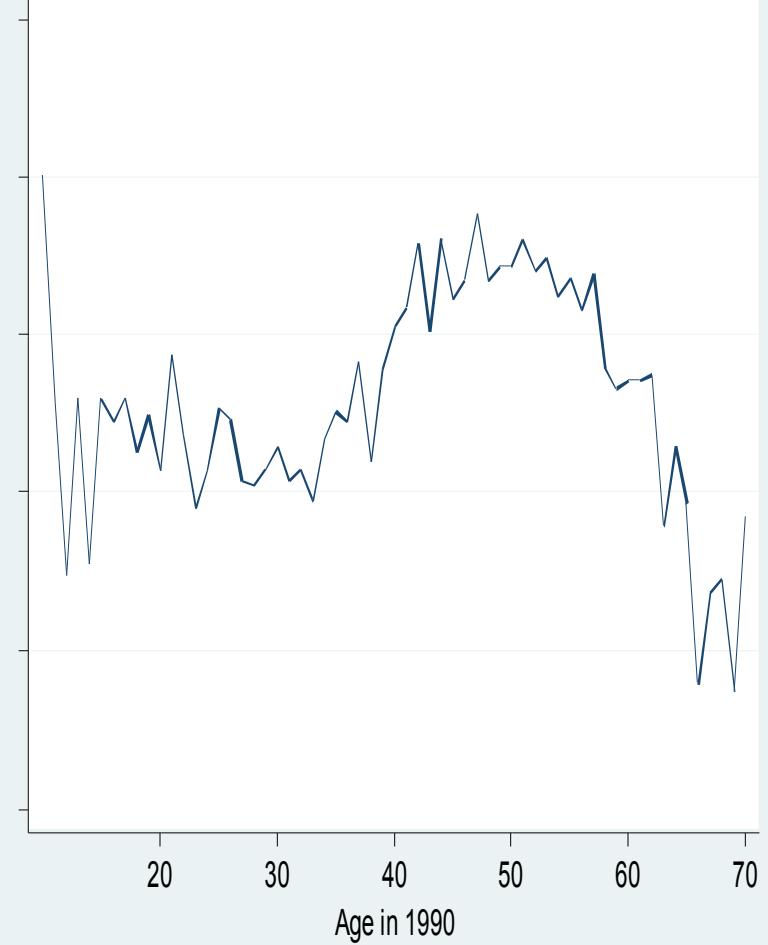

Cohort Effects on Income, Consumption, and Saving Rates

Income and Consumption

Year Effects on Income, Consumption, and Saving Rates

Income and Consumption

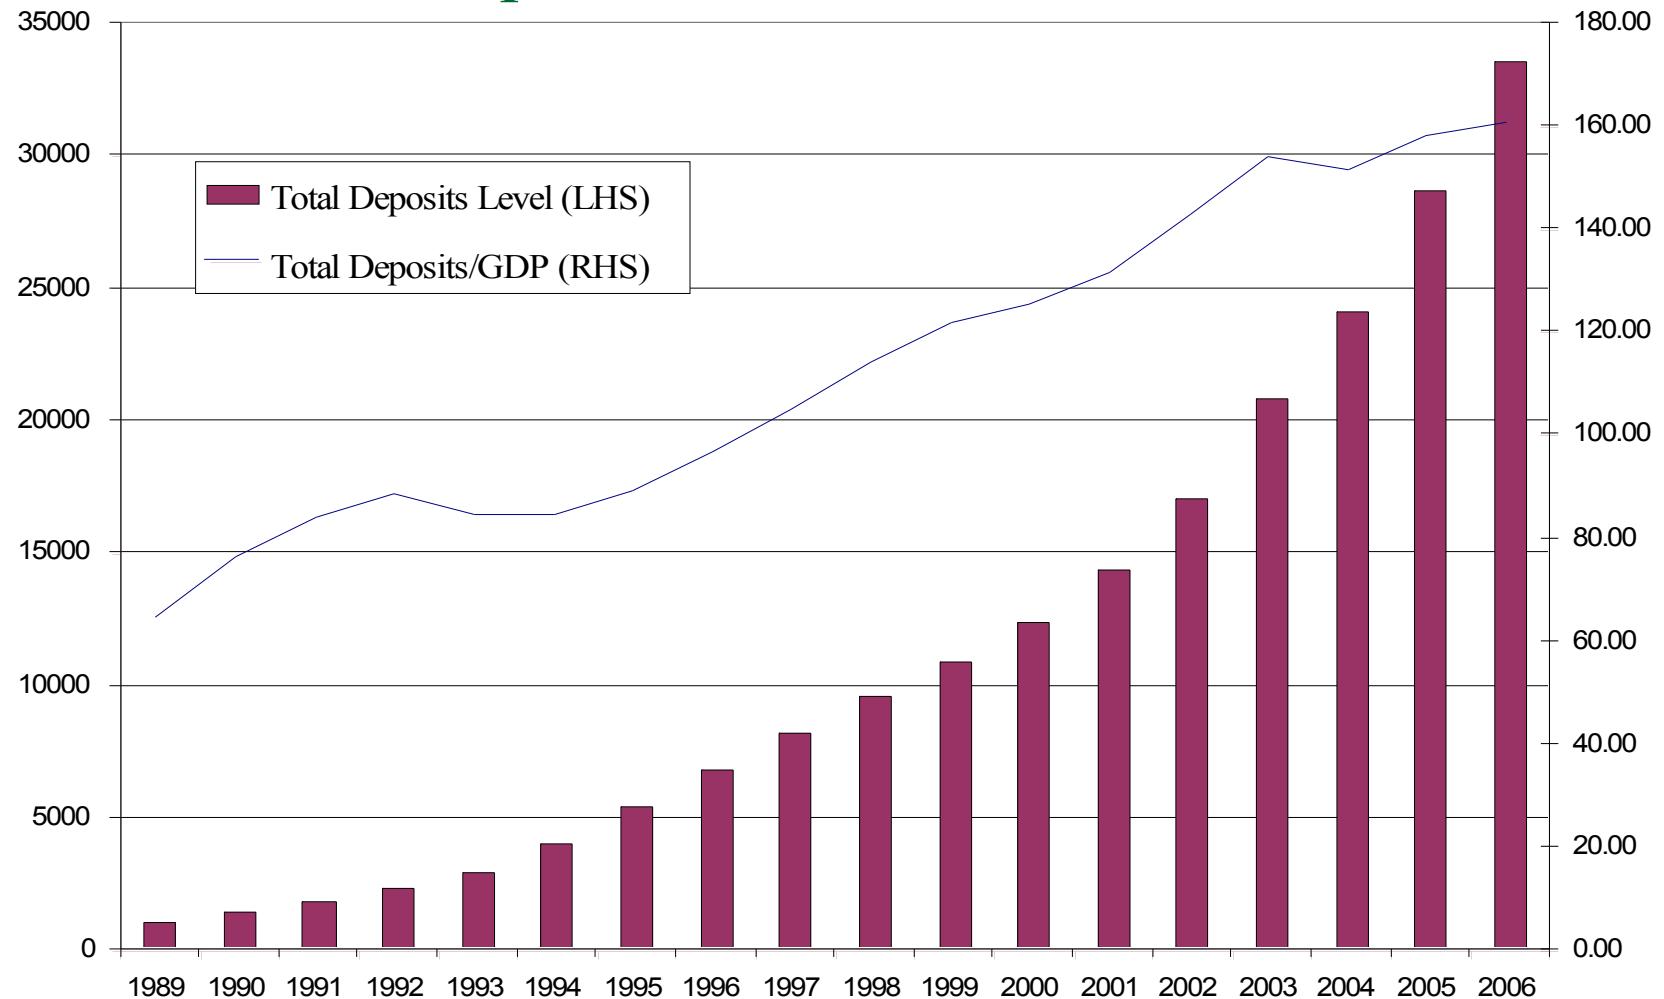

Year Effect on Savings

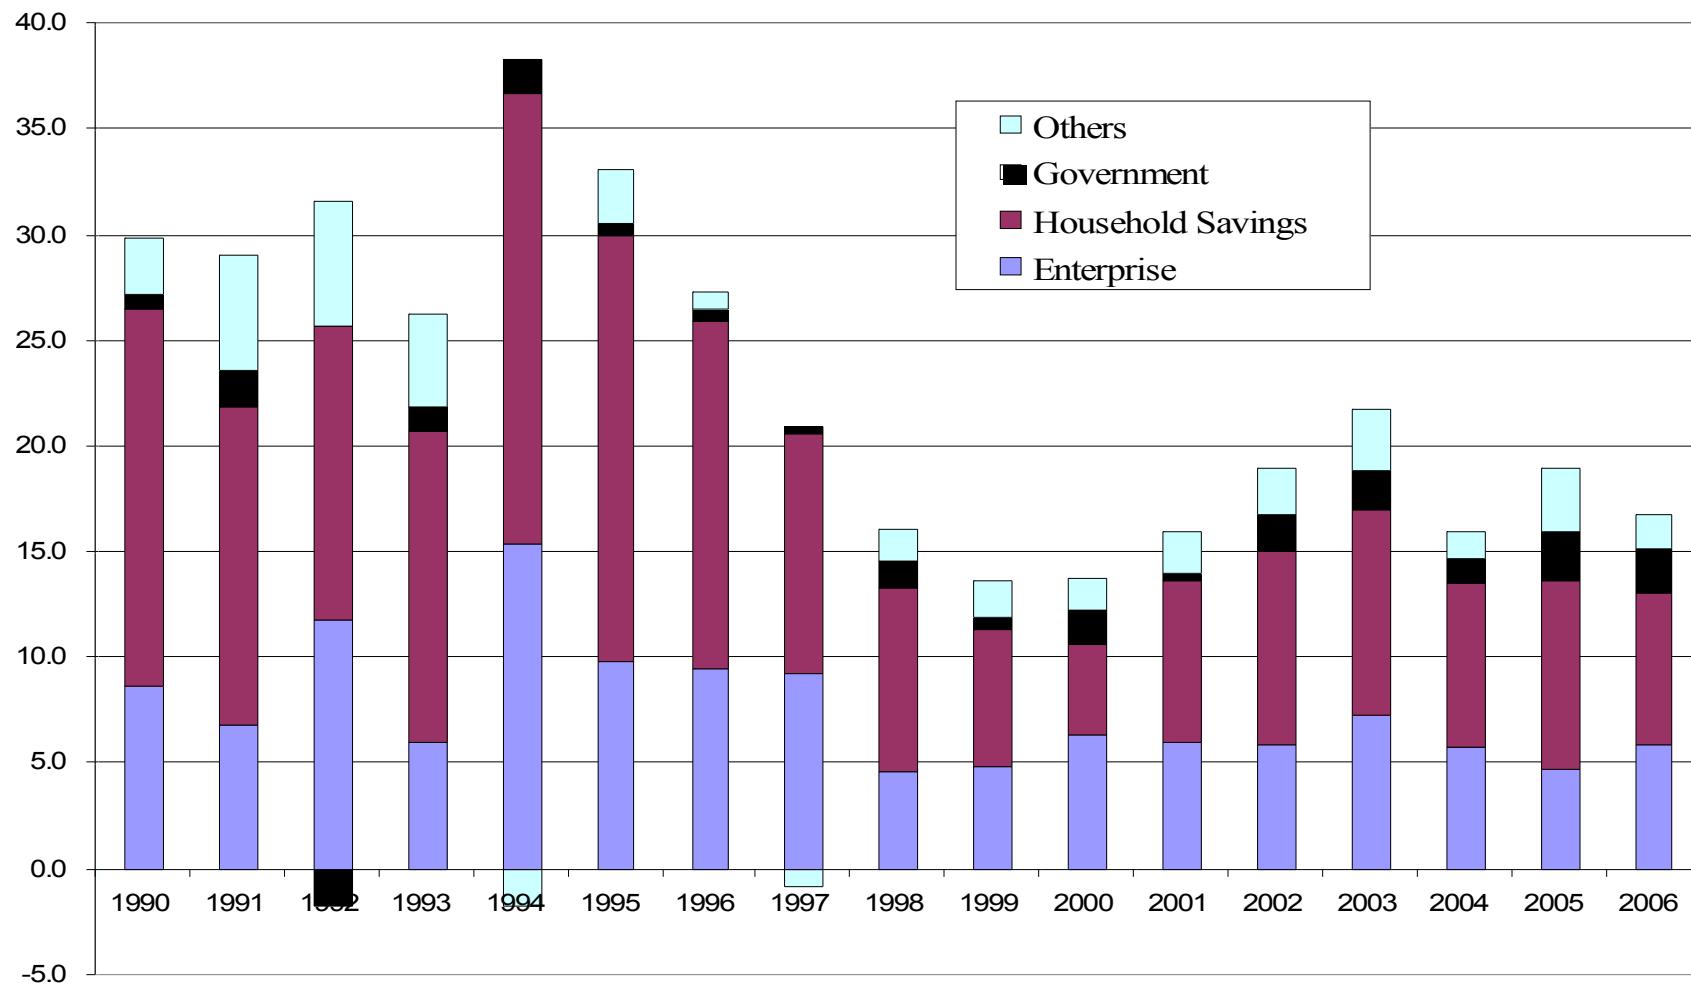

Deposits in the Chinese Banking System

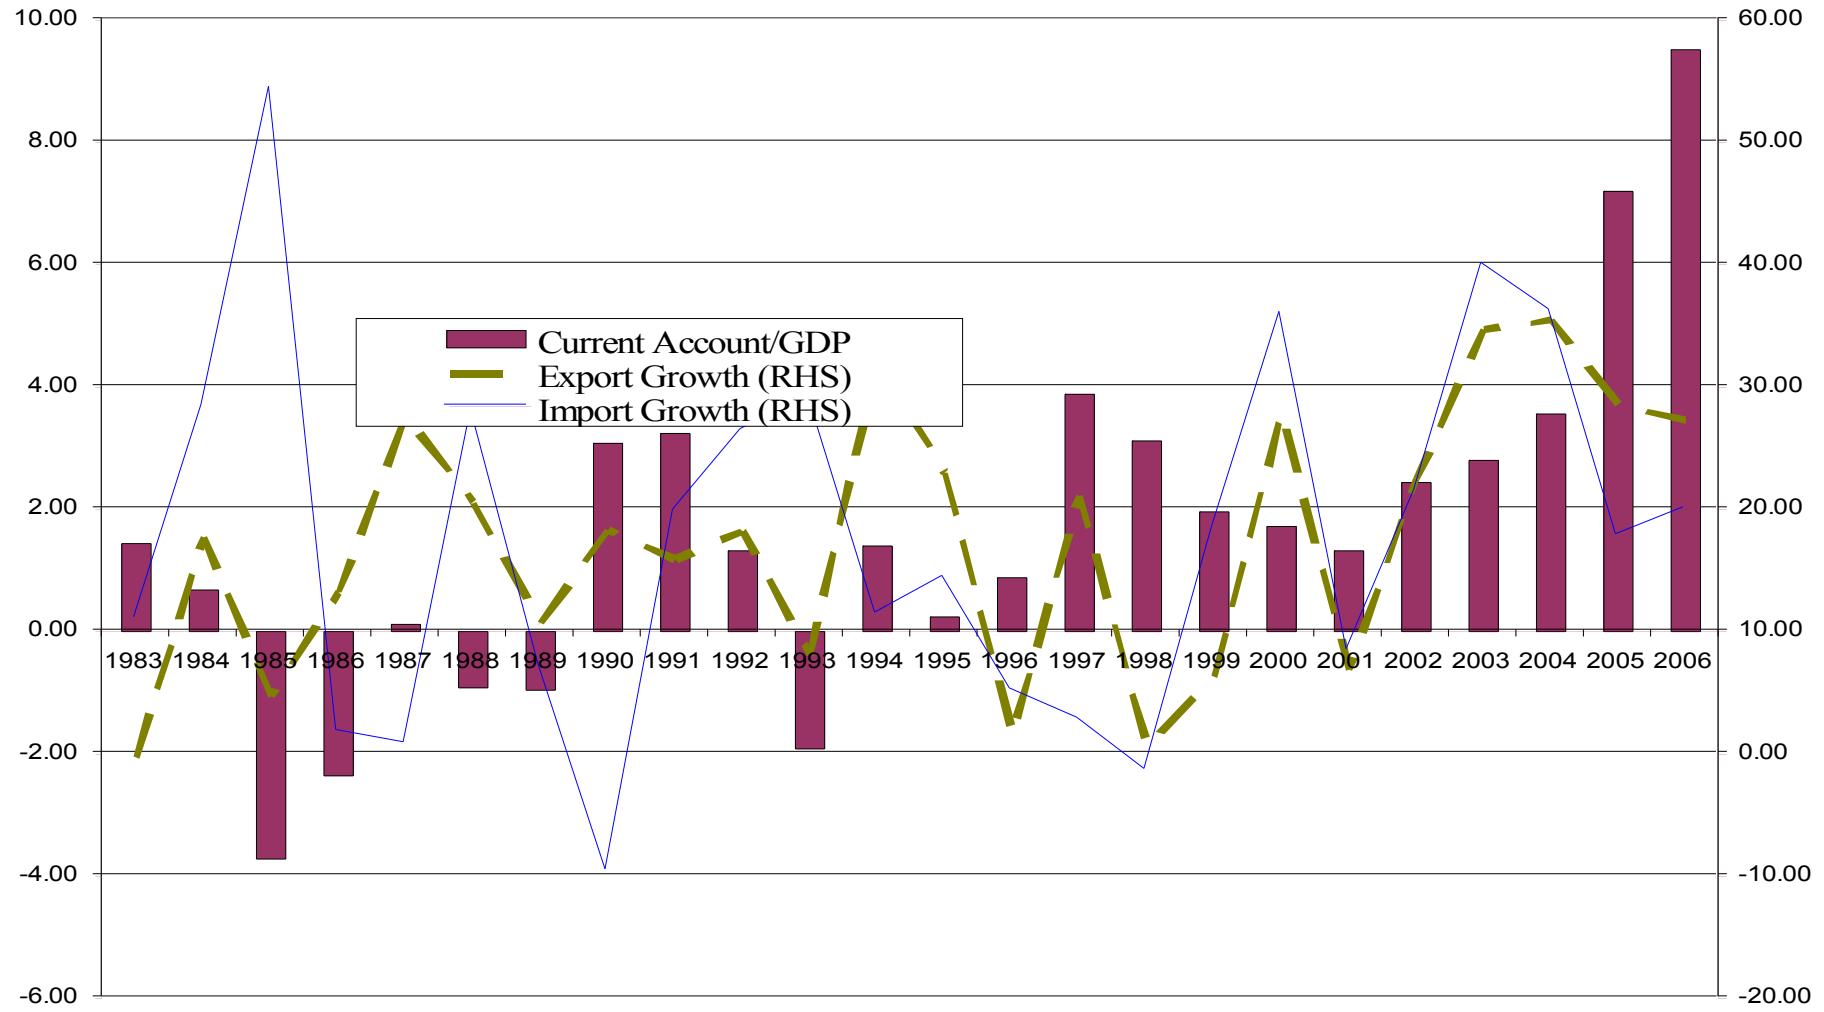

Total Deposits in Financial Institutions

Growth of Total Deposits and Contributions of Components (in percent)

Current Accounts/GDP, Export and Import Growth

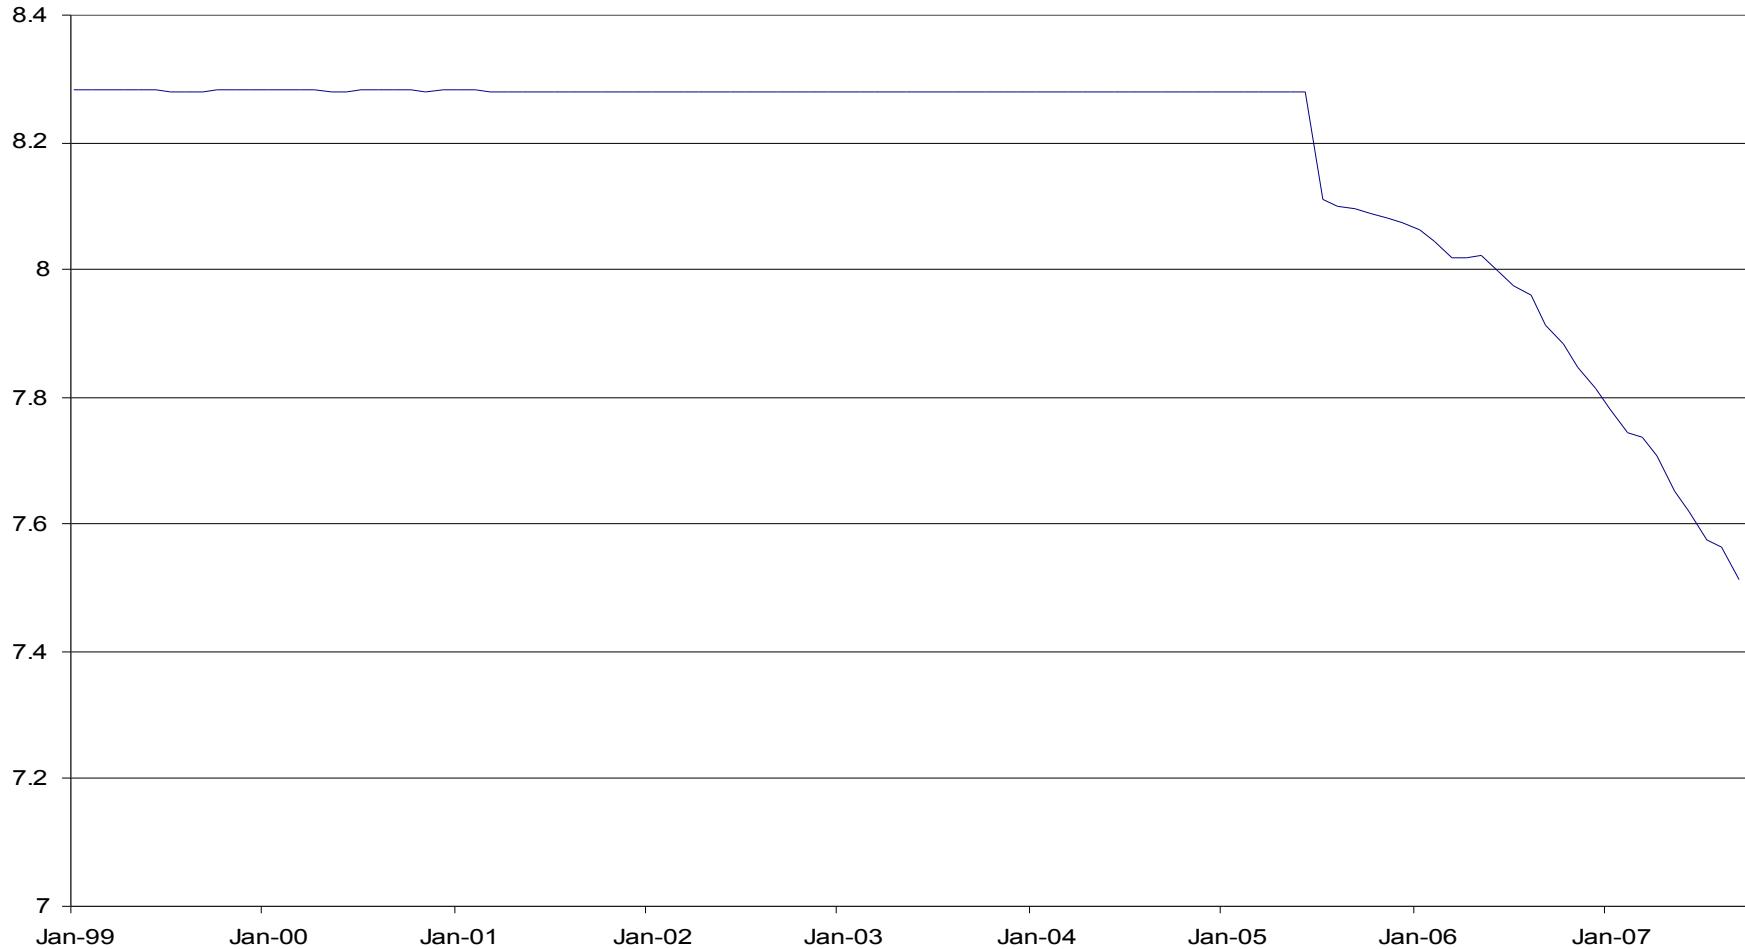

Macro Policy Distortions

- Lack of fx flexibility
- Capital controls
- Financial repression

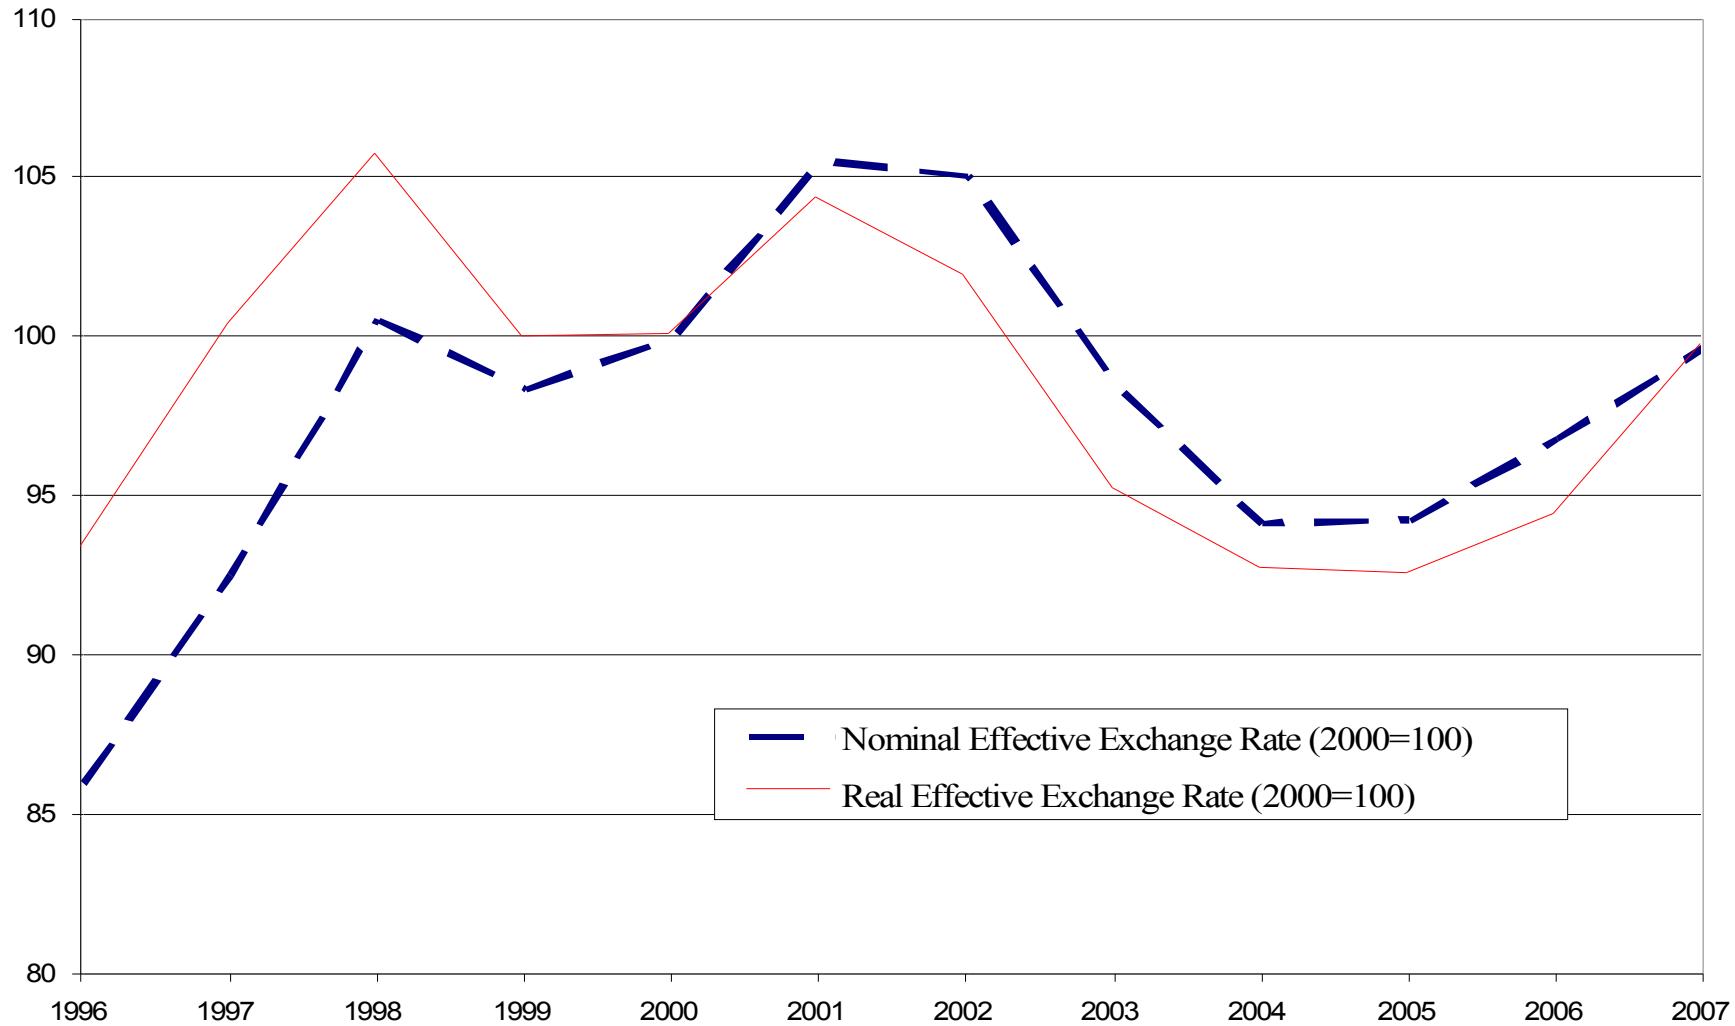

Exchange Rate Flexibility: Not!

- Renminbi tied to U.S. dollar since 1995
- 2.1% revaluation on July 21, 2005
- About 10% bilateral appreciation to date
- Much smaller in nominal/real effective terms

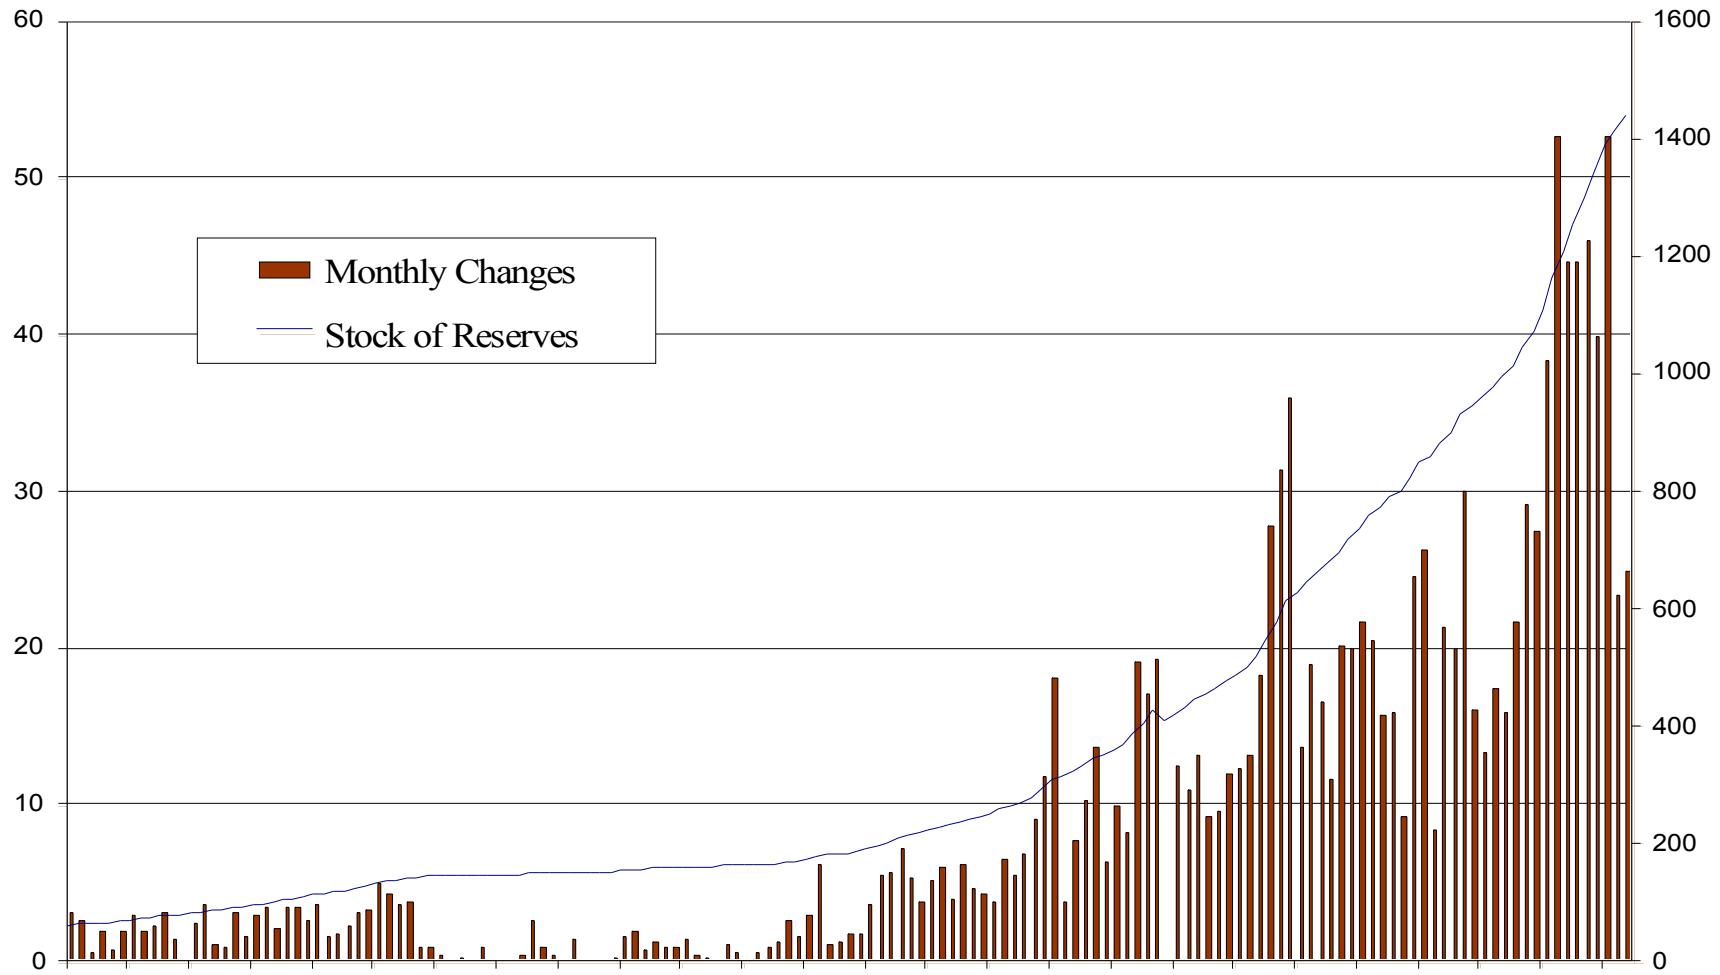

RMB-USD Exchange Rate (1999 – present)

Real and Nominal Effective Exchange Rates

Foreign Exchange Reserves: Flows and Stocks

Stocks of Reserves and Central Bank Bills (in billion of RMB)

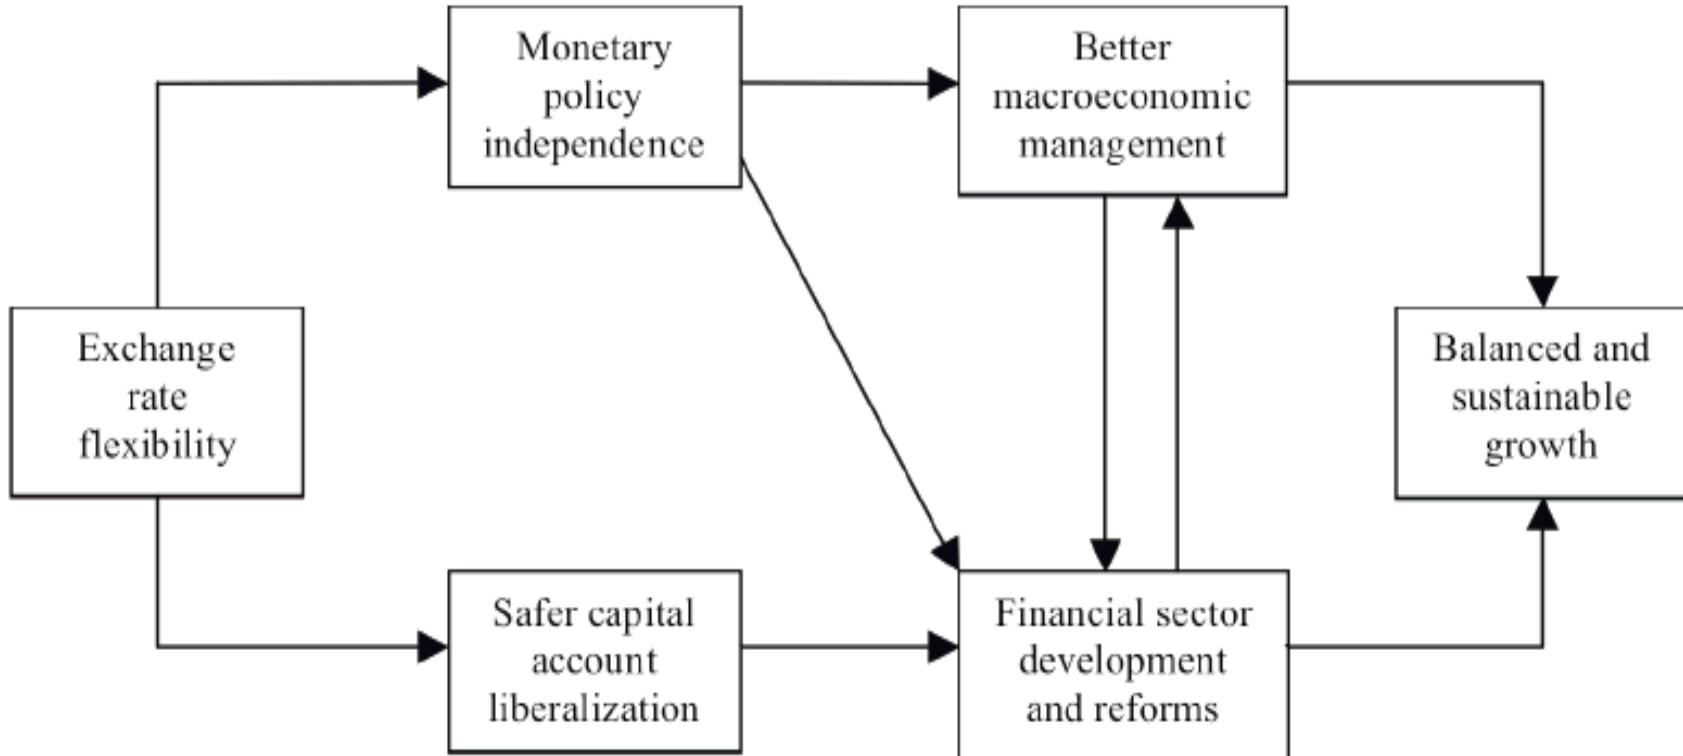

PBC Bill Rates vs. U.S. Treasury Yields (in percent, annualized)

Lack of Exchange Rate Flexibility Complicates Macro Policy and Reforms

Making the Right Connections

A Framework for Independent Monetary Policy

- A long-run low inflation objective
- Macro and financial stability
- Fx flexibility would evolve naturally
- Would assist in financial sector reforms
- Good time to put new framework in place

Independent Monetary Policy

- Flexibility, not revaluation
- Flexibility, not free float
- Capital account liberalization not solution in itself

The Reform Process

- Incremental approach not easy
- Controlled experiments harder
- Reforms are connected
- Need a framework for reforms

Risks: External and Internal Shocks

- Sudden stop/reversal of capital inflows

China's International Investment Position

	2004	2005	2006
Net Position	293	423	662
A. Assets	930	1223	1627
Reserve assets	619	826	1073
Other	311	397	554
B. Liabilities	637	800	965
FDI	369	472	544
Other	268	329	420

Risks

- Sudden stop/reversal of capital inflows
- Plunge in value of US dollar
- Collapse of external demand
- U.S. trade sanctions

China-U.S. Relations

- The exchange rate issue
- Opening up of the financial services sector
- Common interests not often emphasized
- Strategic Economic Dialogue needs benchmarks
- Risks of the legislative process
- Legislation in motion in Senate, House

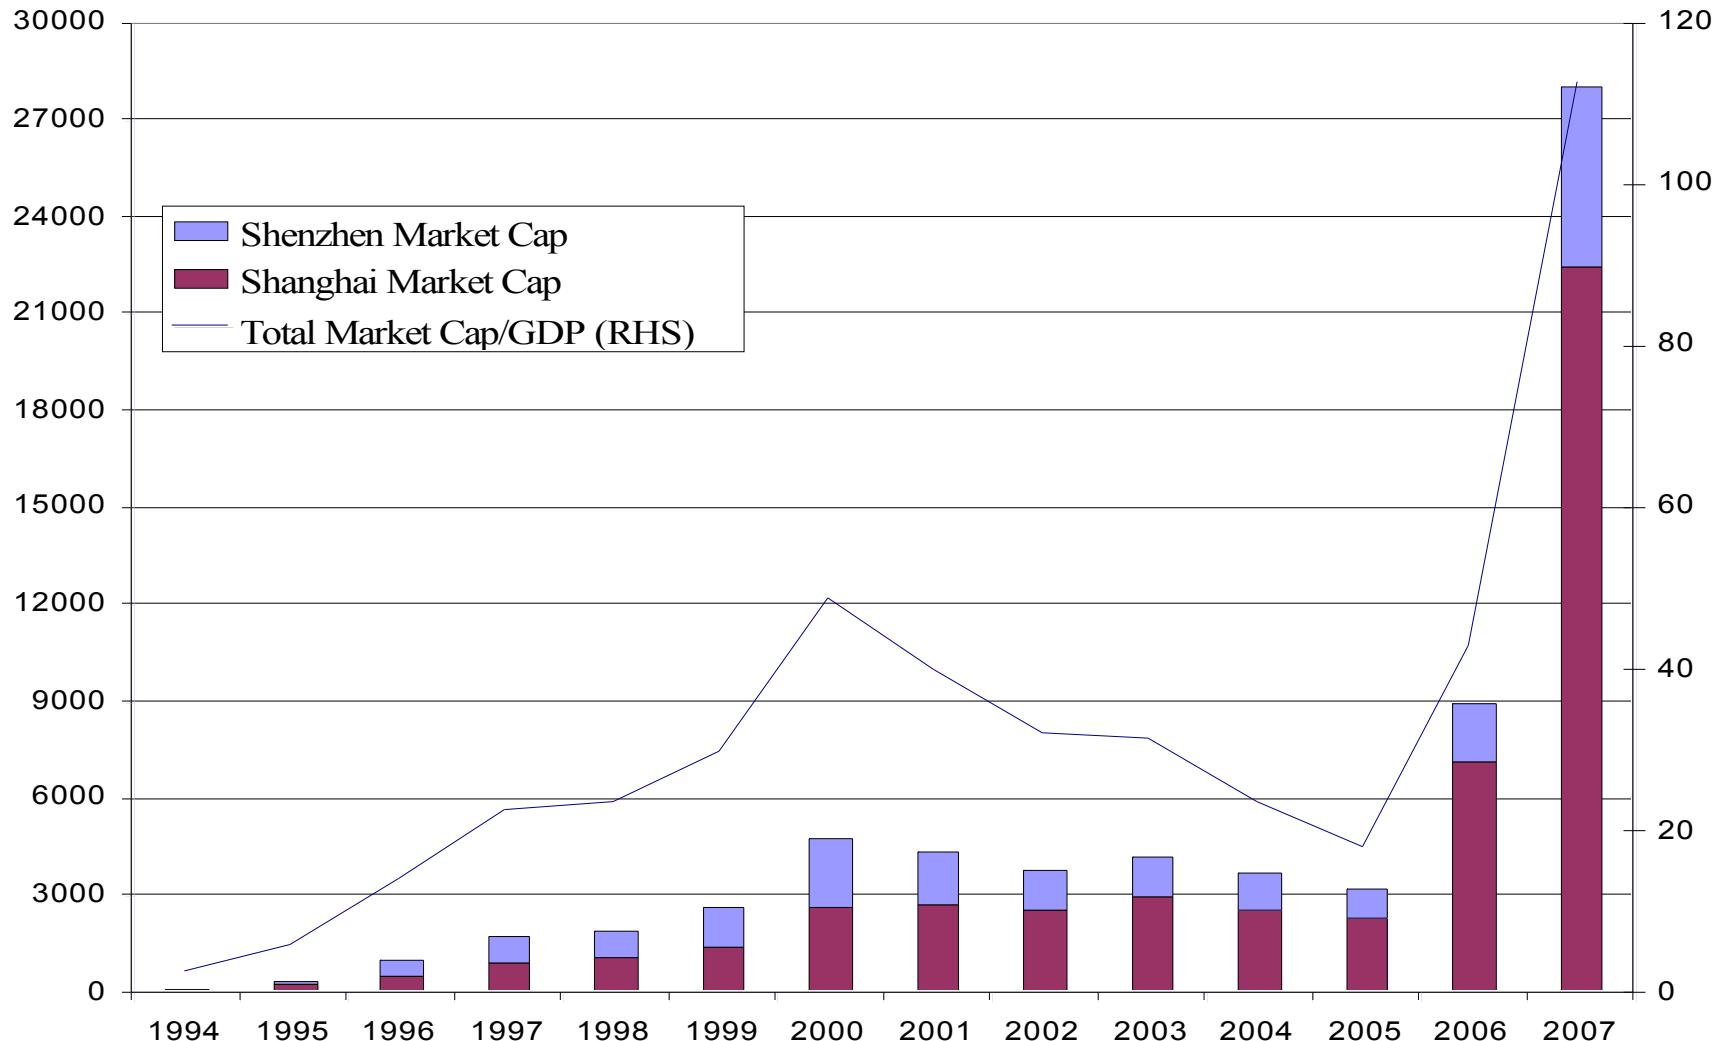

Risks

- Sudden stop/reversal of capital inflows
- Plunge in value of US dollar
- Collapse of external demand
- U.S. trade sanctions
- Loss of confidence in banking system

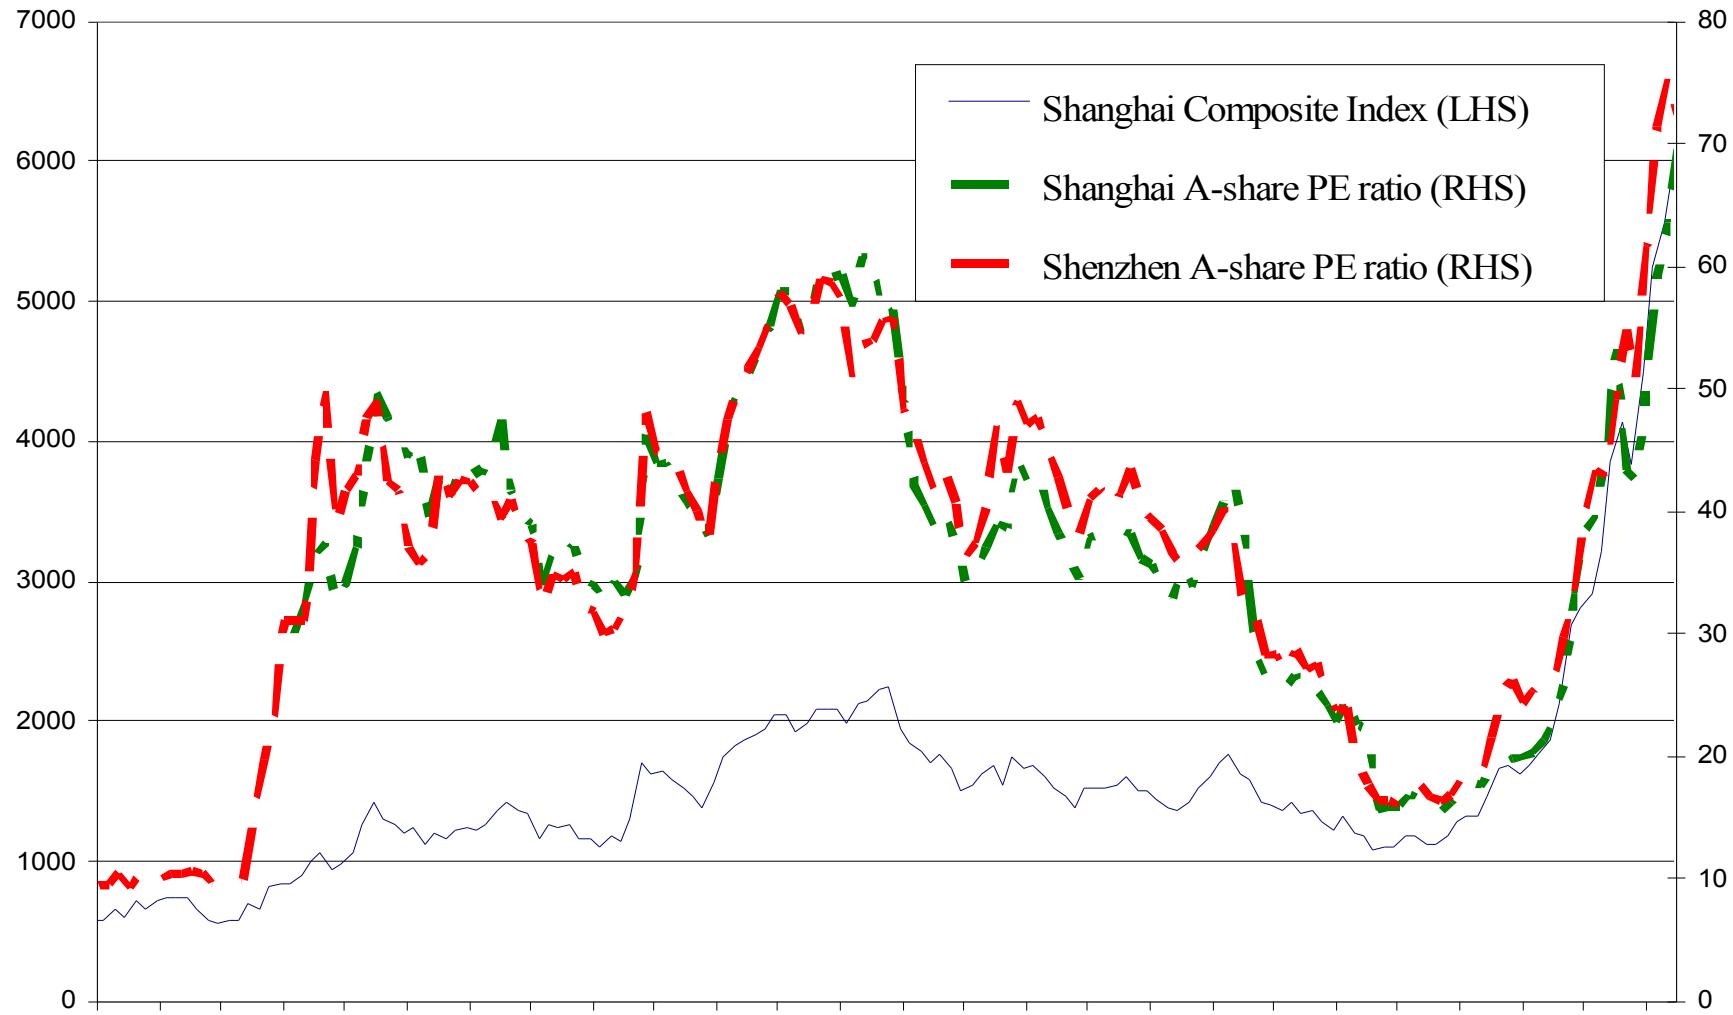

Risks

- Sudden stop/reversal of capital inflows
- Plunge in value of US dollar
- Collapse of external demand
- U.S. trade sanctions
- Loss of confidence in banking system
- Asset price busts

Stock Market Capitalization

Stock Market Valuations

Risks

- Sudden stop/reversal of capital inflows
- Plunge in value of US dollar
- Collapse of external demand
- U.S. trade sanctions
- Loss of confidence in banking system
- Asset price busts
- Social instability

Looking Ahead

- Economy has many fundamental strengths
 - System rigid; some shocks could trigger growth slowdown (but meltdown unlikely)
 - External pressure could help, if done right
